1.1 Packages

Here are the packages with brief descriptions (if available):

HandballStatistics	15
HandballStatistics.Commands	15
HandballStatistics.EntityFramework	15
HandballStatistics.EntityFramework.Contexts	15
HandballStatistics.EntityFramework.Migrations	15
HandballStatistics.Exceptions	16
HandballStatistics.GUI	16
HandballStatistics.GUI.Controls	16
HandballStatistics.GUI.Properties	16
HandballStatistics.GUI.Styles	16
HandballStatistics.GUI.Styles.Controls	16
HandballStatistics.GUI.Views	17
HandballStatistics.Interfaces	17
HandballStatistics.Interfaces.Authenticators	17
HandballStatistics.Interfaces.Models	17
HandballStatistics.Interfaces.Navigators	17
HandballStatistics.Interfaces.Services	18
HandballStatistics.Interfaces.ViewModels	19
HandballStatistics.Models	19
HandballStatistics.Services	19
HandballStatistics.Services.AuthenticationServices	19
HandballStatistics.Services.Converters	20
HandballStatistics.Services.DbServices	20
HandballStatistics.Services.Factories	20
HandballStatistics.Services.Navigators	20
HandballStatistics.Testing	20
HandballStatistics.ViewModels	21
HandballStatistics.Websites	21
XamlGeneratedNamespace	21

Chapter 2

Hierarchical Index

2.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

Application	
HandballStatistics.GUI.App	29
System.Windows.Application	
HandballStatistics.GUI.App	29
HandballStatistics.GUI.App	29
DbContext	
HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext	53
DbMigration	
HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts	27
HandballStatistics.EntityFramework.Migrations.AddedMissingModels	28
HandballStatistics.EntityFramework.Migrations.InitialCreate	68
HandballStatistics.Models.DomainObject	42
HandballStatistics.Models.Account	23
HandballStatistics.Models.Country	41
HandballStatistics.Models.Hall	51
HandballStatistics.Models.League	77
HandballStatistics.Models.Match	88
HandballStatistics.Models.Player	95
HandballStatistics.Models.Shot	102
HandballStatistics.Models.Team	104
HandballStatistics.Models.User	114
Exception	
HandballStatistics.Exceptions.InvalidPasswordException	71
HandballStatistics.Interfaces.Services.IAuthenticationService	63
HandballStatistics.Services.AuthenticationServices.AuthenticationService	31

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

HandballStatistics.Models.Account	
Base class for Account (p. 23). Derives from DomainObject (p. 42) class.	23
HandballStatistics.Services.DbServices.AccountDataService	25
HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts	27
HandballStatistics.EntityFramework.Migrations.AddedMissingModels	28
HandballStatistics.GUI.App	
Interaction logic for App.xaml	29
HandballStatistics.Services.AuthenticationServices.AuthenticationService	
Base class for AuthenticationService (p. 31). Derives from IAuthenticationService class. . . .	31
HandballStatistics.Services.AuthenticationServices.Authenticator	
Base class for Authenticator (p. 33). Derives from ObservableObject class. Derives from IAuthenticator class.	33
HandballStatistics.Commands.CommandBase	36
HandballStatistics.GUI.Views.ConfigurationView	
ConfigurationView (p. 37)	37
HandballStatistics.ViewModels.ConfigurationViewModel	
Base class for ConfigurationViewModel (p. 38). Derives from ViewModelBase (p. 117) class. . . .	38
HandballStatistics.Services.Factories.ConfigurationViewModelFactory	40
HandballStatistics.Models.Country	
Base class for Country (p. 41). Derives from DomainObject (p. 42) class.	41
HandballStatistics.Models.DomainObject	
Base class for DomainObject (p. 42)	42
HandballStatistics.Services.Converters.EqualValueToParameterConverter	43
HandballStatistics.Websites.Facebook	
Base class for Facebook (p. 44). Derives from WebsiteBase (p. 124) class.	44
XamlGeneratedNamespace.GeneratedInternalTypeHelper	
GeneratedInternalTypeHelper (p. 46)	46
HandballStatistics.Services.DbServices.GenericDataService< T >	48
HandballStatistics.Commands.GoToWebsiteCommand	50
HandballStatistics.Models.Hall	
Base class for Hall (p. 51). Derives from DomainObject (p. 42) class.	51
HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext	53
HandballStatistics.GUI.Views.HelpView	
HelpView (p. 56)	56
HandballStatistics.ViewModels.HelpViewModel	
Base class for HelpViewModel (p. 57). Derives from ViewModelBase (p. 117) class.	57

HandballStatistics.Services.Factories.HelpViewModelFactory	58
HandballStatistics.GUI.Views.HomeView	
HomeView (p. 59)	59
HandballStatistics.ViewModels.HomeViewModel	
Base class for HomeViewModel (p. 60). Derives from ViewModelBase (p. 117) class.	60
HandballStatistics.Services.Factories.HomeViewModelFactory	62
HandballStatistics.Interfaces.Services.IAccountDataService	63
HandballStatistics.Interfaces.Services.IAuthenticationService	63
HandballStatistics.Interfaces.Authenticators.IAuthenticator	64
HandballStatistics.Interfaces.Services.IDataService< T >	66
HandballStatistics.Interfaces.ViewModels.ILoginViewModel	67
HandballStatistics.Interfaces.Navigators.INavigator	68
HandballStatistics.EntityFramework.Migrations.InitialCreate	68
HandballStatistics.Websites.Instagram	
Base class for Instagram (p. 69). Derives from WebsiteBase (p. 124) class.	69
HandballStatistics.Exceptions.InvalidPasswordException	71
HandballStatistics.Interfaces.Navigators.IRenavigator	73
HandballStatistics.Interfaces.ViewModels.IViewModelAbstractFactory	73
HandballStatistics.Interfaces.ViewModels.IViewModelBase	74
HandballStatistics.Interfaces.ViewModels.IViewModelFactory< T >	75
HandballStatistics.Interfaces.Navigators.IWebNavigator	75
HandballStatistics.Interfaces.Models.IWebsite	76
HandballStatistics.Models.League	
Base class for League (p. 77). Derives from DomainObject (p. 42) class.	77
HandballStatistics.Commands.LoginCommand	78
HandballStatistics.GUI.Views.LoginView	
LoginView (p. 79)	79
HandballStatistics.ViewModels.LoginViewModel	
Base class for LoginViewModel (p. 81). Derives from ViewModelBase (p. 117) class.	81
HandballStatistics.Services.Factories.LoginViewModelFactory	83
HandballStatistics.ViewModels.MainViewModel	
Base class for MainViewModel (p. 84). Derives from ViewModelBase (p. 117) class.	84
HandballStatistics.GUI.MainWindow	
Interaction logic for MainWindow.xaml	87
HandballStatistics.Models.Match	
Base class for Match (p. 88). Derives from DomainObject (p. 42) class.	88
HandballStatistics.GUI.Controls.NavigationBar	
Interaction logic for NavigationBar.xaml	89
HandballStatistics.GUI.Styles.Controls.NavigationBarButtons	
NavigationBarButtons (p. 91)	91
HandballStatistics.Services.Navigators.Navigator	91
HandballStatistics.Services.DbServices.NonQueryDataService< T >	92
HandballStatistics.Models.ObservableObject	
Base class for ObservableObject (p. 94). Derives from INotifyPropertyChanged class.	94
HandballStatistics.Models.Player	
Base class for Player (p. 95). Derives from DomainObject (p. 42) class.	95
HandballStatistics.GUI.Views.ProfileView	
ProfileView (p. 97)	97
HandballStatistics.ViewModels.ProfileViewModel	
Base class for ProfileViewModel (p. 99). Derives from ViewModelBase (p. 117) class.	99
HandballStatistics.Services.Factories.ProfileViewModelFactory	100
HandballStatistics.Testing.Program	
Base class for Program (p. 101).	101
HandballStatistics.Models.Shot	
Base class for Shot (p. 102). Derives from DomainObject (p. 42) class.	102
HandballStatistics.Models.Team	
Base class for Team (p. 104). Derives from DomainObject (p. 42) class.	104

HandballStatistics.GUI.Views.TrackGameView	
TrackGameView (p. 105)	105
HandballStatistics.ViewModels.TrackGameViewModel	
Base class for TrackGameViewModel (p. 107). Derives from ViewModelBase (p. 117) class.	107
HandballStatistics.Services.Factories.TrackGameViewModelFactory	111
HandballStatistics.Websites.Twitter	
Base class for Twitter (p. 112). Derives from WebsiteBase (p. 124) class.	112
HandballStatistics.Commands.UpdateCurrentViewModelCommand	113
HandballStatistics.Models.User	
Base class for Shot (p. 102). Derives from DomainObject (p. 42) class.	114
HandballStatistics.Services.Factories.ViewModelAbstractFactory	116
HandballStatistics.ViewModels.ViewModelBase	
Base class for ViewModelBase (p. 117). Derives from IViewModelBase class.	117
HandballStatistics.Services.Navigators.ViewModelFactoryRenavigator< TViewModel >	119
HandballStatistics.GUI.Views.ViewStatsView	
ViewStatsView (p. 120)	120
HandballStatistics.ViewModels.ViewStatsViewModel	
Base class for ViewStatsViewModel (p. 121). Derives from ViewModelBase (p. 117) class.	121
HandballStatistics.Services.Factories.ViewStatsViewModelFactory	123
HandballStatistics.Websites.WebsiteBase	
Base class for WebsiteBase (p. 124). Derives from IWebsite class.	124

Chapter 4

Chapter 5

Namespace Documentation

5.1 HandballStatistics Namespace Reference

5.2 HandballStatistics.Commands Namespace Reference

Classes

- class **CommandBase**
- class **GoToWebsiteCommand**
- class **LoginCommand**
- class **UpdateCurrentViewModelCommand**

5.3 HandballStatistics.EntityFramework Namespace Reference

5.4 HandballStatistics.EntityFramework.Contexts Namespace Reference

Classes

- class **HandballStatisticsDbContext**

5.5 HandballStatistics.EntityFramework.Migrations Namespace Reference

Classes

- class **AddedDbSetAccounts**
- class **AddedMissingModels**
- class **Configuration**
- class **InitialCreate**

5.6 HandballStatistics.Exceptions Namespace Reference

Classes

- class **InvalidPasswordException**

5.7 HandballStatistics.GUI Namespace Reference

Classes

- class **App**
Interaction logic for App.xaml
- class **MainWindow**
Interaction logic for MainWindow.xaml

5.8 HandballStatistics.GUI.Controls Namespace Reference

Classes

- class **NavigationBar**
Interaction logic for NavigationBar.xaml

5.9 HandballStatistics.GUI.Properties Namespace Reference

Classes

- class **Resources**
A strongly-typed resource class, for looking up localized strings, etc.
- class **Settings**

5.10 HandballStatistics.GUI.Styles Namespace Reference

5.11 HandballStatistics.GUI.Styles.Controls Namespace Reference

Classes

- class **NavigationBarButtons**
NavigationBarButtons (p. 91)

5.12 HandballStatistics.GUI.Views Namespace Reference

Classes

- class **ConfigurationView**
ConfigurationView (p. 37)
- class **HelpView**
HelpView (p. 56)
- class **HomeView**
HomeView (p. 59)
- class **LoginView**
LoginView (p. 79)
- class **ProfileView**
ProfileView (p. 97)
- class **TrackGameView**
TrackGameView (p. 105)
- class **ViewStatsView**
ViewStatsView (p. 120)

5.13 HandballStatistics.Interfaces Namespace Reference

5.14 HandballStatistics.Interfaces.Authenticators Namespace Reference

Classes

- interface **IAuthenticator**

5.15 HandballStatistics.Interfaces.Models Namespace Reference

Classes

- interface **IWebsite**

5.16 HandballStatistics.Interfaces.Navigators Namespace Reference

Classes

- interface **INavigator**
- interface **IRenavigator**
- interface **IWebNavigator**

Enumerations

- enum **ViewType** {
 Login , **Home** , **TrackGame** , **ViewStats** ,
 Configuration , **Profile** , **Help** }
- enum **Link** { **Facebook** , **Instagram** , **Twitter** }

5.16.1 Enumeration Type Documentation

5.16.1.1 Link

```
enum HandballStatistics.Interfaces.Navigators.Link
```

Definition at line 10 of file **IWebNavigator.cs**.

5.16.1.2 ViewType

```
enum HandballStatistics.Interfaces.Navigators.ViewType
```

Definition at line 6 of file **INavigator.cs**.

5.17 HandballStatistics.Interfaces.Services Namespace Reference

Classes

- interface **IAccountDataService**
- interface **IAuthenticationService**
- interface **IDataService**

Enumerations

- enum **RegistrationResult** { **Success** , **PasswordsDoNotMatch** , **EmailAlreadyExists** , **UsernameAlreadyExists** }

5.17.1 Enumeration Type Documentation

5.17.1.1 RegistrationResult

```
enum HandballStatistics.Interfaces.Services.RegistrationResult
```

Definition at line 6 of file **IAuthenticationService.cs**.

5.18 HandballStatistics.Interfaces.ViewModels Namespace Reference

Classes

- interface **ILoginViewModel**
- interface **IViewModelAbstractFactory**
- interface **IViewModelBase**
- interface **IViewModelFactory**

5.19 HandballStatistics.Models Namespace Reference

Classes

- class **Account**
*Base class for **Account** (p. 23). Derives from **DomainObject** (p. 42) class.*
- class **Country**
*Base class for **Country** (p. 41). Derives from **DomainObject** (p. 42) class.*
- class **DomainObject**
*Base class for **DomainObject** (p. 42)*
- class **Hall**
*Base class for **Hall** (p. 51). Derives from **DomainObject** (p. 42) class.*
- class **League**
*Base class for **League** (p. 77). Derives from **DomainObject** (p. 42) class.*
- class **Match**
*Base class for **Match** (p. 88). Derives from **DomainObject** (p. 42) class.*
- class **ObservableObject**
*Base class for **ObservableObject** (p. 94). Derives from **INotifyPropertyChanged** class.*
- class **Player**
*Base class for **Player** (p. 95). Derives from **DomainObject** (p. 42) class.*
- class **Shot**
*Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.*
- class **Team**
*Base class for **Team** (p. 104). Derives from **DomainObject** (p. 42) class.*
- class **User**
*Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.*

5.20 HandballStatistics.Services Namespace Reference

5.21 HandballStatistics.Services.AuthenticationServices Namespace Reference

Classes

- class **AuthenticationService**
*Base class for **AuthenticationService** (p. 31). Derives from **IAuthenticationService** class.*
- class **Authenticator**
*Base class for **Authenticator** (p. 33). Derives from **ObservableObject** class. Derives from **IAuthenticator** class.*

5.22 HandballStatistics.Services.Converters Namespace Reference

Classes

- class `EqualValueToParameterConverter`

5.23 HandballStatistics.Services.DbServices Namespace Reference

Classes

- class `AccountDataService`
- class `GenericDataService`
- class `NonQueryDataService`

5.24 HandballStatistics.Services.Factories Namespace Reference

Classes

- class `ConfigurationViewModelFactory`
- class `HelpViewModelFactory`
- class `HomeViewModelFactory`
- class `LoginViewModelFactory`
- class `ProfileViewModelFactory`
- class `TrackGameViewModelFactory`
- class `ViewModelAbstractFactory`
- class `ViewStatsViewModelFactory`

5.25 HandballStatistics.Services.Navigators Namespace Reference

Classes

- class `Navigator`
- class `ViewModelFactoryRenavigator`

5.26 HandballStatistics.Testing Namespace Reference

Classes

- class `Program`
*Base class for **Program** (p. 101).*

5.27 HandballStatistics.ViewModels Namespace Reference

Classes

- class **ConfigurationViewModel**
*Base class for **ConfigurationViewModel** (p. 38). Derives from **ViewModelBase** (p. 117) class.*
- class **HelpViewModel**
*Base class for **HelpViewModel** (p. 57). Derives from **ViewModelBase** (p. 117) class.*
- class **HomeViewModel**
*Base class for **HomeViewModel** (p. 60). Derives from **ViewModelBase** (p. 117) class.*
- class **LoginViewModel**
*Base class for **LoginViewModel** (p. 81). Derives from **ViewModelBase** (p. 117) class.*
- class **MainViewModel**
*Base class for **MainViewModel** (p. 84). Derives from **ViewModelBase** (p. 117) class.*
- class **ProfileViewModel**
*Base class for **ProfileViewModel** (p. 99). Derives from **ViewModelBase** (p. 117) class.*
- class **TrackGameViewModel**
*Base class for **TrackGameViewModel** (p. 107). Derives from **ViewModelBase** (p. 117) class.*
- class **ViewModelBase**
*Base class for **ViewModelBase** (p. 117). Derives from **IViewModelBase** class.*
- class **ViewStatsViewModel**
*Base class for **ViewStatsViewModel** (p. 121). Derives from **ViewModelBase** (p. 117) class.*

5.28 HandballStatistics.Websites Namespace Reference

Classes

- class **Facebook**
*Base class for **Facebook** (p. 44). Derives from **WebsiteBase** (p. 124) class.*
- class **Instagram**
*Base class for **Instagram** (p. 69). Derives from **WebsiteBase** (p. 124) class.*
- class **Twitter**
*Base class for **Twitter** (p. 112). Derives from **WebsiteBase** (p. 124) class.*
- class **WebsiteBase**
*Base class for **WebsiteBase** (p. 124). Derives from **IWebsite** class.*

5.29 XamlGeneratedNamespace Namespace Reference

Classes

- class **GeneratedInternalTypeHelper**
***GeneratedInternalTypeHelper** (p. 46)*

Chapter 6

Class Documentation

6.1 HandballStatistics.Models.Account Class Reference

Base class for **Account** (p. 23). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Account:

Public Member Functions

- **Account** (**User** user)

*Prevents a default instance of the **Account** (p. 23) class from being created.> Initializes a new instance of the **HandballStatistics.Models.Account** (p. 23) class.*

Properties

- int **AccountHolderId** [get, set]
Gets or sets AccountHolderId.
- **User** **AccountHolder** [get, set]
Gets or sets AccountHolder.

6.1.1 Detailed Description

Base class for **Account** (p. 23). Derives from **DomainObject** (p. 42) class.

Definition at line 7 of file **Account.cs**.

6.1.2 Constructor & Destructor Documentation

6.1.2.1 Account()

```
HandballStatistics.Models.Account.Account (
    User user )
```

Prevents a default instance of the **Account** (p. 23) class from being created.> Initializes a new instance of the **HandballStatistics.Models.Account** (p. 23) class.

Parameters

<i>user</i>	User (p. 114) the current Account (p. 23) belongs to
-------------	--

Definition at line 15 of file **Account.cs**.

6.1.3 Property Documentation

6.1.3.1 AccountHolder

```
User HandballStatistics.Models.Account.AccountHolder [get], [set]
```

Gets or sets AccountHolder.

Definition at line 39 of file **Account.cs**.

6.1.3.2 AccountHolderId

```
int HandballStatistics.Models.Account.AccountHolderId [get], [set]
```

Gets or sets AccountHolderId.

Definition at line 34 of file **Account.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Account.cs

6.2 HandballStatistics.Services.DbServices.AccountDataService Class Reference

Inheritance diagram for HandballStatistics.Services.DbServices.AccountDataService:

Public Member Functions

- **AccountDataService** (**HandballStatisticsDbContext** context)
- async Task< **Account** > **Create** (**Account** entity)
- async Task< bool > **Delete** (int id)
- async Task< **Account** > **Update** (int id, **Account** entity)
- async Task< **Account** > **Get** (int id)
- async Task< IEnumerable< **Account** > > **GetAll** ()
- Task< bool > **Init** ()
- async Task< **Account** > **GetByEmail** (string email)
- async Task< **Account** > **GetByUsername** (string username)

6.2.1 Detailed Description

Definition at line 12 of file **AccountDataService.cs**.

6.2.2 Constructor & Destructor Documentation

6.2.2.1 AccountDataService()

```
HandballStatistics.Services.DbServices.AccountDataService.AccountDataService (
    HandballStatisticsDbContext context )
```

Definition at line 18 of file **AccountDataService.cs**.

6.2.3 Member Function Documentation

6.2.3.1 Create()

```
async Task< Account > HandballStatistics.Services.DbServices.AccountDataService.Create (
    Account entity )
```

Definition at line 24 of file **AccountDataService.cs**.

6.2.3.2 Delete()

```
async Task< bool > HandballStatistics.Services.DbServices.AccountDataService.Delete (
    int id )
```

Definition at line 32 of file **AccountDataService.cs**.

6.2.3.3 Get()

```
async Task< Account > HandballStatistics.Services.DbServices.AccountDataService.Get (
    int id )
```

Definition at line 48 of file **AccountDataService.cs**.

6.2.3.4 GetAll()

```
async Task< IEnumerable< Account > > HandballStatistics.Services.DbServices.AccountData↵
Service.GetAll ( )
```

Definition at line 59 of file **AccountDataService.cs**.

6.2.3.5 GetByEmail()

```
async Task< Account > HandballStatistics.Services.DbServices.AccountDataService.GetByEmail (
    string email )
```

Implements **HandballStatistics.Interfaces.Services.IAccountDataService** (p. 63).

Definition at line 88 of file **AccountDataService.cs**.

6.2.3.6 GetByUsername()

```
async Task< Account > HandballStatistics.Services.DbServices.AccountDataService.GetByUsername
(
    string username )
```

Implements **HandballStatistics.Interfaces.Services.IAccountDataService** (p. 63).

Definition at line 98 of file **AccountDataService.cs**.

6.2.3.7 Init()

```
Task< bool > HandballStatistics.Services.DbServices.AccountDataService.Init ( )
```

Definition at line 70 of file **AccountDataService.cs**.

6.2.3.8 Update()

```
async Task< Account > HandballStatistics.Services.DbServices.AccountDataService.Update (
    int id,
    Account entity )
```

Definition at line 40 of file **AccountDataService.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/DbServices/AccountDataService.cs

6.3 HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts Class Reference

Inheritance diagram for HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts:

Public Member Functions

- override void **Up** ()
- override void **Down** ()

6.3.1 Detailed Description

Definition at line 6 of file 202205231339178_AddedDbSetAccounts.cs.

6.3.2 Member Function Documentation

6.3.2.1 Down()

```
override void HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts.Down ( )
```

Definition at line 23 of file 202205231339178_AddedDbSetAccounts.cs.

6.3.2.2 Up()

```
override void HandballStatistics.EntityFramework.Migrations.AddedDbSetAccounts.Up ( )
```

Definition at line 8 of file 202205231339178_AddedDbSetAccounts.cs.

The documentation for this class was generated from the following files:

- HandballStatistics.EntityFramework/Migrations/202205231339178_AddedDbSetAccounts.cs
- HandballStatistics.EntityFramework/Migrations/202205231339178_AddedDbSetAccounts.Designer.cs

6.4 HandballStatistics.EntityFramework.Migrations.AddedMissingModels Class Reference

Inheritance diagram for HandballStatistics.EntityFramework.Migrations.AddedMissingModels:

Public Member Functions

- override void **Up** ()
- override void **Down** ()

6.4.1 Detailed Description

Definition at line 6 of file 202205270006000_AddedMissingModels.cs.

6.4.2 Member Function Documentation

6.4.2.1 Down()

```
override void HandballStatistics.EntityFramework.Migrations.AddedMissingModels.Down ( )
```

Definition at line **104** of file **202205270006000_AddedMissingModels.cs**.

6.4.2.2 Up()

```
override void HandballStatistics.EntityFramework.Migrations.AddedMissingModels.Up ( )
```

Definition at line **8** of file **202205270006000_AddedMissingModels.cs**.

The documentation for this class was generated from the following files:

- HandballStatistics.EntityFramework/Migrations/202205270006000_AddedMissingModels.cs
- HandballStatistics.EntityFramework/Migrations/202205270006000_AddedMissingModels.Designer.cs

6.5 HandballStatistics.GUI.App Class Reference

Interaction logic for App.xaml

Inheritance diagram for HandballStatistics.GUI.App:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

Static Public Member Functions

- static void **Main** ()
Application Entry Point.
- static void **Main** ()
Application Entry Point.

Protected Member Functions

- override void **OnStartup** (StartupEventArgs e)

6.5.1 Detailed Description

Interaction logic for App.xaml

App (p. 29)

Definition at line 21 of file **App.xaml.cs**.

6.5.2 Member Function Documentation

6.5.2.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.App.InitializeComponent ( )
```

InitializeComponent

Definition at line 51 of file **App.g.cs**.

6.5.2.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.App.InitializeComponent ( )
```

InitializeComponent

Definition at line 51 of file **App.g.i.cs**.

6.5.2.3 Main() [1/2]

```
static void HandballStatistics.GUI.App.Main ( ) [static]
```

Application Entry Point.

Definition at line 71 of file **App.g.cs**.

6.5.2.4 Main() [2/2]

```
static void HandballStatistics.GUI.App.Main ( ) [static]
```

Application Entry Point.

Definition at line 71 of file **App.g.i.cs**.

6.5.2.5 OnStartup()

```
override void HandballStatistics.GUI.App.OnStartup (
    StartupEventArgs e ) [protected]
```

Definition at line 23 of file **App.xaml.cs**.

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/App.xaml.cs
- HandballStatistics.GUI/obj/Debug/App.g.cs
- HandballStatistics.GUI/obj/Debug/App.g.i.cs

6.6 HandballStatistics.Services.AuthenticationServices.AuthenticationService Class Reference

Base class for **AuthenticationService** (p. 31). Derives from **IAuthenticationService** class.

Inheritance diagram for HandballStatistics.Services.AuthenticationServices.AuthenticationService:

Public Member Functions

- **AuthenticationService** (**IAccountDataService** accountService)
*Prevents a default instance of the **AuthenticationService** (p. 31) class from being created. Initializes a new instance of the **HandballStatistics.Services.AuthenticationServices.AuthenticationService** (p. 31) class.*
- async Task< **Account** > **Login** (string username, string password)
Checks existence of Account and logs in if exists.
- async Task< RegistrationResult > **Register** (string username, string email, string password, string confirmPassword)
Checks existence of username, email and compares passwords.

6.6.1 Detailed Description

Base class for **AuthenticationService** (p. 31). Derives from `IAuthenticationService` class.

Definition at line 13 of file **AuthenticationService.cs**.

6.6.2 Constructor & Destructor Documentation

6.6.2.1 AuthenticationService()

```
HandballStatistics.Services.AuthenticationServices.AuthenticationService.AuthenticationService  
(  
    IAccountDataService accountService )
```

Prevents a default instance of the **AuthenticationService** (p. 31) class from being created. Initializes a new instance of the **HandballStatistics.Services.AuthenticationServices.AuthenticationService** (p. 31) class.

Parameters

<i>accountService</i>	Registered <code>IAccountDataService</code> .
-----------------------	---

Definition at line 29 of file **AuthenticationService.cs**.

6.6.3 Member Function Documentation

6.6.3.1 Login()

```
async Task< Account > HandballStatistics.Services.AuthenticationServices.Authentication↔  
Service.Login (   
    string username,  
    string password )
```

Checks existence of Account and logs in if exists.

Parameters

<i>username</i>	String username.
<i>password</i>	String password.

Returns

Implements **HandballStatistics.Interfaces.Services.IAuthenticationService** (p. 63).

Definition at line 43 of file **AuthenticationService.cs**.

6.6.3.2 Register()

```
async Task< RegistrationResult > HandballStatistics.Services.AuthenticationServices.AuthenticationService.Register (
    string username,
    string email,
    string password,
    string confirmPassword )
```

Checks existence of username, email and compares passwords.

Parameters

<i>username</i>	String username.
<i>email</i>	String email.
<i>password</i>	String password.
<i>confirmPassword</i>	String confirm password.

Implements **HandballStatistics.Interfaces.Services.IAuthenticationService** (p. 63).

Definition at line 57 of file **AuthenticationService.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/AuthenticationServices/AuthenticationService.cs

6.7 HandballStatistics.Services.AuthenticationServices.Authenticator Class Reference

Base class for **Authenticator** (p. 33). Derives from ObservableObject class. Derives from IAuthenticator class.

Inheritance diagram for HandballStatistics.Services.AuthenticationServices.Authenticator:

Public Member Functions

- **Authenticator** (**IAuthenticationService** authenticationService)
*Initializes a new instance of the **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 33) class.*
- async Task< bool > **Login** (string username, string password)
- void **Logout** ()
- async Task< RegistrationResult > **Register** (string username, string email, string password, string confirmPassword)↵

Properties

- **Account CurrentAccount** [get]
Gets or sets .
- bool **IsLoggedIn** [get]
Gets a value indicating whether this instance .

Additional Inherited Members

6.7.1 Detailed Description

Base class for **Authenticator** (p. 33). Derives from ObservableObject class. Derives from IAuthenticator class.

Definition at line 14 of file **Authenticator.cs**.

6.7.2 Constructor & Destructor Documentation

6.7.2.1 Authenticator()

```
HandballStatistics.Services.AuthenticationServices.Authenticator.Authenticator (
    IAuthenticationService authenticationService )
```

Initializes a new instance of the **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 33) class.

Parameters

<i>authenticationService</i>	
------------------------------	--

Definition at line 36 of file **Authenticator.cs**.

6.7.3 Member Function Documentation

6.7.3.1 Login()

```
async Task< bool > HandballStatistics.Services.AuthenticationServices.Authenticator.Login (
    string username,
    string password )
```

Parameters

<i>username</i>	
<i>password</i>	

Returns

Implements **HandballStatistics.Interfaces.Authenticators.IAuthenticator** (p. 64).

Definition at line 76 of file **Authenticator.cs**.

6.7.3.2 Logout()

```
void HandballStatistics.Services.AuthenticationServices.Authenticator.Logout ( )
```

Implements **HandballStatistics.Interfaces.Authenticators.IAuthenticator** (p. 64).

Definition at line 96 of file **Authenticator.cs**.

6.7.3.3 Register()

```
async Task< RegistrationResult > HandballStatistics.Services.AuthenticationServices.Authenticator.↵
Register (
    string username,
    string email,
    string password,
    string confirmPassword )
```

Parameters

<i>username</i>	
<i>email</i>	
<i>password</i>	
<i>confirmPassword</i>	

Returns

Implements **HandballStatistics.Interfaces.Authenticators.IAuthenticator** (p. 64).

Definition at line **110** of file **Authenticator.cs**.

6.7.4 Property Documentation

6.7.4.1 CurrentAccount

Account HandballStatistics.Services.AuthenticationServices.Authenticator.CurrentAccount [get]

Gets or sets .

Implements **HandballStatistics.Interfaces.Authenticators.IAuthenticator** (p. 64).

Definition at line **48** of file **Authenticator.cs**.

6.7.4.2 IsLoggedIn

bool HandballStatistics.Services.AuthenticationServices.Authenticator.IsLoggedIn [get]

Gets a value indicating whether this instance .

true if this instance ; otherwise, false.

Implements **HandballStatistics.Interfaces.Authenticators.IAuthenticator** (p. 64).

Definition at line **65** of file **Authenticator.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/AuthenticationServices/Authenticator.cs

6.8 HandballStatistics.Commands.CommandBase Class Reference

Inheritance diagram for HandballStatistics.Commands.CommandBase:

Public Member Functions

- virtual bool **CanExecute** (object parameter)
- abstract void **Execute** (object parameter)

Events

- EventHandler **CanExecuteChanged**

6.8.1 Detailed Description

Definition at line 6 of file **CommandBase.cs**.

6.8.2 Event Documentation

6.8.2.1 CanExecuteChanged

EventHandler HandballStatistics.Commands.CommandBase.CanExecuteChanged

Definition at line 8 of file **CommandBase.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Commands/CommandBase.cs

6.9 HandballStatistics.GUI.Views.ConfigurationView Class Reference

ConfigurationView (p. 37)

Inheritance diagram for HandballStatistics.GUI.Views.ConfigurationView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.9.1 Detailed Description

ConfigurationView (p. 37)

Interaction logic for ConfigurationView.xaml

Definition at line 41 of file **ConfigurationView.g.cs**.

6.9.2 Constructor & Destructor Documentation

6.9.2.1 ConfigurationView()

`HandballStatistics.GUI.Views.ConfigurationView.ConfigurationView ()`

Definition at line 23 of file **ConfigurationView.xaml.cs**.

6.9.3 Member Function Documentation

6.9.3.1 InitializeComponent() [1/2]

`void HandballStatistics.GUI.Views.ConfigurationView.InitializeComponent ()`

InitializeComponent

Definition at line 50 of file **ConfigurationView.g.cs**.

6.9.3.2 InitializeComponent() [2/2]

`void HandballStatistics.GUI.Views.ConfigurationView.InitializeComponent ()`

InitializeComponent

Definition at line 50 of file **ConfigurationView.g.i.cs**.

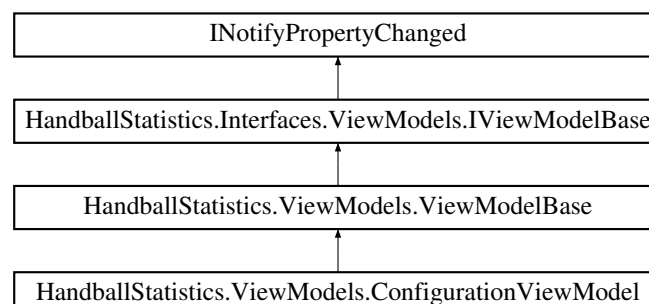

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/ConfigurationView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/ConfigurationView.g.i.cs
- HandballStatistics.GUI/Views/ConfigurationView.xaml.cs

6.10 HandballStatistics.ViewModels.ConfigurationViewModel Class Reference

Base class for **ConfigurationViewModel** (p. 38). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.ConfigurationViewModel:

Public Member Functions

- **ConfigurationViewModel** ()

*Prevents a default instance of the **ConfigurationViewModel** (p. 38) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ConfigurationViewModel** (p. 38) class.*

Properties

- string **Username** [get, set]

Gets or sets username.

- string **WelcomeMessage** [get, set]

Gets or sets welcomeMessage.

Additional Inherited Members

6.10.1 Detailed Description

Base class for **ConfigurationViewModel** (p. 38). Derives from **ViewModelBase** (p. 117) class.

Definition at line 7 of file **ConfigurationViewModel.cs**.

6.10.2 Constructor & Destructor Documentation

6.10.2.1 ConfigurationViewModel()

```
HandballStatistics.ViewModels.ConfigurationViewModel.ConfigurationViewModel ( )
```

Prevents a default instance of the **ConfigurationViewModel** (p. 38) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ConfigurationViewModel** (p. 38) class.

Definition at line 26 of file **ConfigurationViewModel.cs**.

6.10.3 Property Documentation

6.10.3.1 Username

```
string HandballStatistics.ViewModels.ConfigurationViewModel.Username [get], [set]
```

Gets or sets username.

Definition at line 37 of file **ConfigurationViewModel.cs**.

6.10.3.2 WelcomeMessage

```
string HandballStatistics.ViewModels.ConfigurationViewModel.WelcomeMessage [get], [set]
```

Gets or sets welcomeMessage.

Definition at line 50 of file **ConfigurationViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/ConfigurationViewModel.cs

6.11 HandballStatistics.Services.Factories.ConfigurationViewModelFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.ConfigurationViewModelFactory:

Public Member Functions

- **ConfigurationViewModel** CreateViewModel ()

6.11.1 Detailed Description

Definition at line 6 of file **ConfigurationViewModelFactory.cs**.

6.11.2 Member Function Documentation

6.11.2.1 CreateViewModel()

```
ConfigurationViewModel HandballStatistics.Services.Factories.ConfigurationViewModelFactory.CreateViewModel ( )
```

Definition at line 8 of file **ConfigurationViewModelFactory.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/ConfigurationViewModelFactory.cs

6.12 HandballStatistics.Models.Country Class Reference

Base class for **Country** (p. 41). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Country:

Properties

- string **Name** [get, set]
Gets or sets Name.
- ICollection< **Team** > **Teams** [get, set]
Gets or sets Teams.
- ICollection< **Hall** > **Halls** [get, set]
Gets or sets Halls.
- ICollection< **League** > **Leagues** [get, set]
Gets or sets Leagues.

6.12.1 Detailed Description

Base class for **Country** (p. 41). Derives from **DomainObject** (p. 42) class.

Definition at line 9 of file **Country.cs**.

6.12.2 Property Documentation

6.12.2.1 Halls

```
ICollection< Hall> HandballStatistics.Models.Country.Halls [get], [set]
```

Gets or sets Halls.

Definition at line 25 of file **Country.cs**.

6.12.2.2 Leagues

```
ICollection< League> HandballStatistics.Models.Country.Leagues [get], [set]
```

Gets or sets Leagues.

Definition at line 30 of file **Country.cs**.

6.12.2.3 Name

```
string HandballStatistics.Models.Country.Name [get], [set]
```

Gets or sets Name.

Definition at line 15 of file **Country.cs**.

6.12.2.4 Teams

```
ICollection< Team> HandballStatistics.Models.Country.Teams [get], [set]
```

Gets or sets Teams.

Definition at line 20 of file **Country.cs**.

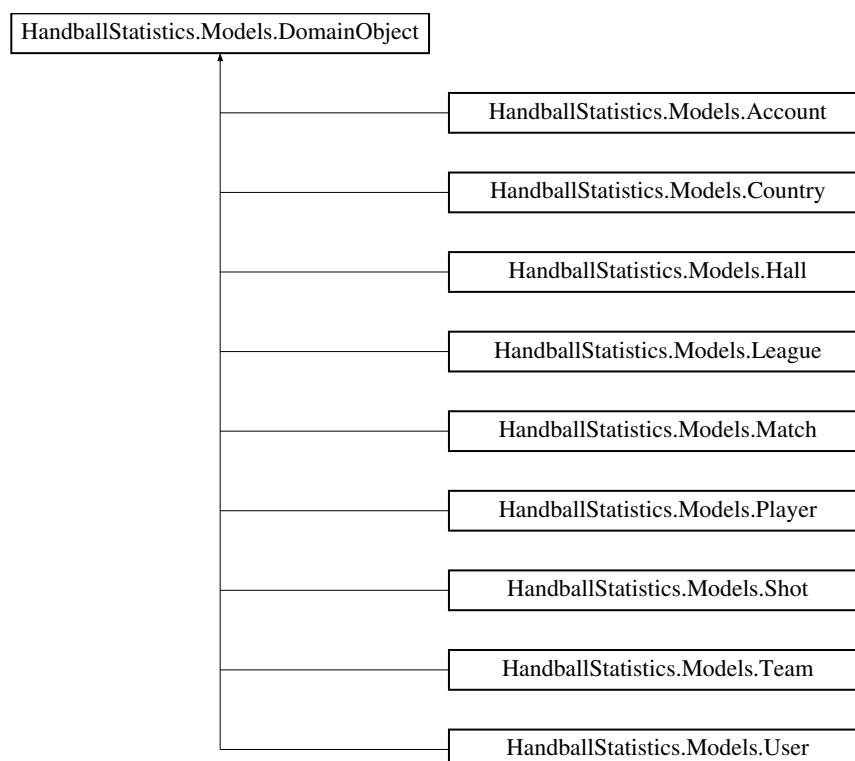

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Country.cs

6.13 HandballStatistics.Models.DomainObject Class Reference

Base class for **DomainObject** (p. 42)

Inheritance diagram for HandballStatistics.Models.DomainObject:

Properties

- int **Id** [get, set]
Gets or sets Id.

6.13.1 Detailed Description

Base class for **DomainObject** (p. 42)

Definition at line 6 of file **DomainObject.cs**.

6.13.2 Property Documentation

6.13.2.1 Id

```
int HandballStatistics.Models.DomainObject.Id [get], [set]
```

Gets or sets Id.

Definition at line 12 of file **DomainObject.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/DomainObject.cs

6.14 HandballStatistics.Services.Converters.EqualValueToParameterConverter Class Reference ↩

Inheritance diagram for HandballStatistics.Services.Converters.EqualValueToParameterConverter:

Public Member Functions

- object **Convert** (object value, Type targetType, object parameter, CultureInfo culture)
- object **ConvertBack** (object value, Type targetType, object parameter, CultureInfo culture)

6.14.1 Detailed Description

Definition at line 7 of file **EqualValueToParameterConverter.cs**.

6.14.2 Member Function Documentation

6.14.2.1 Convert()

```
object HandballStatistics.Services.Converters.EqualValueToParameterConverter.Convert (
    object value,
    Type targetType,
    object parameter,
    CultureInfo culture )
```

Definition at line 9 of file **EqualValueToParameterConverter.cs**.

6.14.2.2 ConvertBack()

```
object HandballStatistics.Services.Converters.EqualValueToParameterConverter.ConvertBack (
    object value,
    Type targetType,
    object parameter,
    CultureInfo culture )
```

Definition at line 14 of file **EqualValueToParameterConverter.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Converters/EqualValueToParameterConverter.cs

6.15 HandballStatistics.Websites.Facebook Class Reference

Base class for **Facebook** (p. 44). Derives from **WebsiteBase** (p. 124) class.

Inheritance diagram for HandballStatistics.Websites.Facebook:

Public Member Functions

- **Facebook** ()

*Prevents a default instance of the **Instagram** (p. 69) class from being created. Initializes a new instance of the **HandballStatistics.Websites.Facebook** (p. 44) class.*

Properties

- override string **Name** [get, set]
Gets or sets Name.
- override string **URL** [get, set]
Gets or sets URL.

6.15.1 Detailed Description

Base class for **Facebook** (p. 44). Derives from **WebsiteBase** (p. 124) class.

Definition at line 7 of file **Facebook.cs**.

6.15.2 Constructor & Destructor Documentation

6.15.2.1 Facebook()

```
HandballStatistics.Websites.Facebook.Facebook ( )
```

Prevents a default instance of the **Instagram** (p. 69) class from being created. Initializes a new instance of the **HandballStatistics.Websites.Facebook** (p. 44) class.

Definition at line 14 of file **Facebook.cs**.

6.15.3 Property Documentation

6.15.3.1 Name

```
override string HandballStatistics.Websites.Facebook.Name [get], [set]
```

Gets or sets Name.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 25 of file **Facebook.cs**.

6.15.3.2 URL

```
override string HandballStatistics.Websites.Facebook.URL [get], [set]
```

Gets or sets URL.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line **30** of file **Facebook.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Websites/Facebook.cs

6.16 XamlGeneratedNamespace.GeneratedInternalTypeHelper Class Reference

GeneratedInternalTypeHelper (p. 46)

Inheritance diagram for XamlGeneratedNamespace.GeneratedInternalTypeHelper:

Protected Member Functions

- override object **CreateInstance** (System.Type type, System.Globalization.CultureInfo culture)
CreateInstance
- override object **GetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, System.Globalization.CultureInfo culture)
GetPropertyValue
- override void **SetPropertyValue** (System.Reflection.PropertyInfo propertyInfo, object target, object value, System.Globalization.CultureInfo culture)
SetPropertyValue
- override System.Delegate **CreateDelegate** (System.Type delegateType, object target, string handler)
CreateDelegate
- override void **AddEventHandler** (System.Reflection.EventInfo eventInfo, object target, System.Delegate handler)
AddEventHandler

6.16.1 Detailed Description

GeneratedInternalTypeHelper (p. 46)

Definition at line **20** of file **GeneratedInternalTypeHelper.g.i.cs**.

6.16.2 Member Function Documentation

6.16.2.1 AddEventHandler()

```
override void XamlGeneratedNamespace.GeneratedInternalTypeHelper.AddEventHandler (
    System.Reflection.EventInfo eventInfo,
    object target,
    System.Delegate handler ) [protected]
```

AddEventHandler

Definition at line 57 of file **GeneratedInternalTypeHelper.g.i.cs**.

6.16.2.2 CreateDelegate()

```
override System.Delegate XamlGeneratedNamespace.GeneratedInternalTypeHelper.CreateDelegate (
    System.Type delegateType,
    object target,
    string handler ) [protected]
```

CreateDelegate

Definition at line 47 of file **GeneratedInternalTypeHelper.g.i.cs**.

6.16.2.3 CreateInstance()

```
override object XamlGeneratedNamespace.GeneratedInternalTypeHelper.CreateInstance (
    System.Type type,
    System.Globalization.CultureInfo culture ) [protected]
```

CreateInstance

Definition at line 25 of file **GeneratedInternalTypeHelper.g.i.cs**.

6.16.2.4 GetPropertyValue()

```
override object XamlGeneratedNamespace.GeneratedInternalTypeHelper.GetPropertyValue (
    System.Reflection.PropertyInfo propertyInfo,
    object target,
    System.Globalization.CultureInfo culture ) [protected]
```

GetPropertyValue

Definition at line 33 of file **GeneratedInternalTypeHelper.g.i.cs**.

6.16.2.5 SetPropertyValue()

```
override void XamlGeneratedNamespace.GeneratedInternalTypeHelper.SetPropertyValue (
    System.Reflection.PropertyInfo propertyInfo,
    object target,
    object value,
    System.Globalization.CultureInfo culture ) [protected]
```

SetPropertyValue

Definition at line 40 of file **GeneratedInternalTypeHelper.g.i.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.GUI/obj/Debug/GeneratedInternalTypeHelper.g.i.cs

6.17 HandballStatistics.Services.DbServices.GenericDataService< T > Class Template Reference

Inheritance diagram for HandballStatistics.Services.DbServices.GenericDataService< T >:

Public Member Functions

- **GenericDataService** (**HandballStatisticsDbContext** context)
- async Task< T > **Create** (T entity)
- async Task< bool > **Delete** (int id)
- async Task< T > **Update** (int id, T entity)
- async Task< T > **Get** (int id)
- async Task< IEnumerable< T > > **GetAll** ()
- Task< bool > **Init** ()

6.17.1 Detailed Description

Type Constraints

T : *DomainObject*

Definition at line 11 of file **GenericDataService.cs**.

6.17.2 Constructor & Destructor Documentation

6.17.2.1 GenericDataService()

```
HandballStatistics.Services.DbServices.GenericDataService< T >. GenericDataService (
    HandballStatisticsDbContext context )
```

Definition at line 16 of file **GenericDataService.cs**.

6.17.3 Member Function Documentation

6.17.3.1 Create()

```
async Task< T > HandballStatistics.Services.DbServices.GenericDataService< T >.Create (
    T entity )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 22 of file **GenericDataService.cs**.

6.17.3.2 Delete()

```
async Task< bool > HandballStatistics.Services.DbServices.GenericDataService< T >.Delete (
    int id )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 30 of file **GenericDataService.cs**.

6.17.3.3 Get()

```
async Task< T > HandballStatistics.Services.DbServices.GenericDataService< T >.Get (
    int id )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 46 of file **GenericDataService.cs**.

6.17.3.4 GetAll()

```
async Task< IEnumerable< T > > HandballStatistics.Services.DbServices.GenericDataService< T >.GetAll ( )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 55 of file **GenericDataService.cs**.

6.17.3.5 Init()

```
Task< bool > HandballStatistics.Services.DbServices.GenericDataService< T >.Init ( )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 64 of file **GenericDataService.cs**.

6.17.3.6 Update()

```
async Task< T > HandballStatistics.Services.DbServices.GenericDataService< T >.Update (
    int id,
    T entity )
```

Implements **HandballStatistics.Interfaces.Services.IDataService< T >** (p. 66).

Definition at line 38 of file **GenericDataService.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/DbServices/GenericDataService.cs

6.18 HandballStatistics.Commands.GoToWebsiteCommand Class Reference

Inheritance diagram for HandballStatistics.Commands.GoToWebsiteCommand:

Public Member Functions

- override void **Execute** (object parameter)

Additional Inherited Members

6.18.1 Detailed Description

Definition at line 6 of file **GoToWebsiteCommand.cs**.

6.18.2 Member Function Documentation

6.18.2.1 Execute()

```
override void HandballStatistics.Commands.GoToWebsiteCommand.Execute (  
    object parameter ) [virtual]
```

Implements **HandballStatistics.Commands.CommandBase** (p. 36).

Definition at line 8 of file **GoToWebsiteCommand.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Commands/GoToWebsiteCommand.cs

6.19 HandballStatistics.Models.Hall Class Reference

Base class for **Hall** (p. 51). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Hall:

Properties

- string **Name** [get, set]
Gets or sets Name.
- string **Address** [get, set]
Gets or sets Address.
- int **CountryId** [get, set]
Gets or sets CountryId.

6.19.1 Detailed Description

Base class for **Hall** (p. 51). Derives from **DomainObject** (p. 42) class.

Definition at line 7 of file **Hall.cs**.

6.19.2 Property Documentation

6.19.2.1 Address

```
string HandballStatistics.Models.Hall.Address [get], [set]
```

Gets or sets Address.

Definition at line 18 of file **Hall.cs**.

6.19.2.2 CountryId

```
int HandballStatistics.Models.Hall.CountryId [get], [set]
```

Gets or sets CountryId.

Definition at line 23 of file **Hall.cs**.

6.19.2.3 Name

```
string HandballStatistics.Models.Hall.Name [get], [set]
```

Gets or sets Name.

Definition at line 13 of file **Hall.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Hall.cs

6.20 HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext Class Reference

Inheritance diagram for HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext:

Public Member Functions

- **HandballStatisticsDbContext CreateContext ()**
- override int **SaveChanges ()**

Properties

- DbSet< **User** > **Users** [get, set]
- DbSet< **Account** > **Accounts** [get, set]
- DbSet< **Country** > **Countries** [get, set]
- DbSet< **Hall** > **Halls** [get, set]
- DbSet< **League** > **Leagues** [get, set]
- DbSet< **Match** > **Matches** [get, set]
- DbSet< **Player** > **Players** [get, set]
- DbSet< **Team** > **Teams** [get, set]

6.20.1 Detailed Description

Definition at line 8 of file **HandballStatisticsDbContext.cs**.

6.20.2 Constructor & Destructor Documentation

6.20.2.1 HandballStatisticsDbContext()

```
HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.HandballStatisticsDbContext ( )
```

Definition at line 31 of file **HandballStatisticsDbContext.cs**.

6.20.3 Member Function Documentation

6.20.3.1 CreateContext()

```
HandballStatisticsDbContext HandballStatistics.EntityFrameworkCore.Contexts.HandballStatistics↵↵  
DbContext.CreateContext ( )
```

Definition at line 38 of file **HandballStatisticsDbContext.cs**.

6.20.3.2 SaveChanges()

```
override int HandballStatistics.EntityFrameworkCore.Contexts.HandballStatisticsDbContext.Save↵↵  
Changes ( )
```

Definition at line 43 of file **HandballStatisticsDbContext.cs**.

6.20.4 Property Documentation

6.20.4.1 Accounts

```
DbSet< Account> HandballStatistics.EntityFrameworkCore.Contexts.HandballStatisticsDbContext.↵↵  
Accounts [get], [set]
```

Definition at line 14 of file **HandballStatisticsDbContext.cs**.

6.20.4.2 Countries

```
DbSet< Country> HandballStatistics.EntityFrameworkCore.Contexts.HandballStatisticsDbContext.↵↵  
Countries [get], [set]
```

Definition at line 16 of file **HandballStatisticsDbContext.cs**.

6.20.4.3 Halls

```
DbSet< Hall> HandballStatistics.EntityFrameworkCore.Contexts.HandballStatisticsDbContext.Halls  
[get], [set]
```

Definition at line 18 of file **HandballStatisticsDbContext.cs**.

6.20.4.4 Leagues

```
DbSet< League> HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.Leagues  
[get], [set]
```

Definition at line 20 of file **HandballStatisticsDbContext.cs**.

6.20.4.5 Matches

```
DbSet< Match> HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.Matches  
[get], [set]
```

Definition at line 22 of file **HandballStatisticsDbContext.cs**.

6.20.4.6 Players

```
DbSet< Player> HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.Players  
[get], [set]
```

Definition at line 24 of file **HandballStatisticsDbContext.cs**.

6.20.4.7 Teams

```
DbSet< Team> HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.Teams  
[get], [set]
```

Definition at line 26 of file **HandballStatisticsDbContext.cs**.

6.20.4.8 Users

```
DbSet< User> HandballStatistics.EntityFramework.Contexts.HandballStatisticsDbContext.Users  
[get], [set]
```

Definition at line 12 of file **HandballStatisticsDbContext.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.EntityFramework/Contexts/HandballStatisticsDbContext.cs

6.21 HandballStatistics.GUI.Views.HelpView Class Reference

HelpView (p. 56)

Inheritance diagram for HandballStatistics.GUI.Views.HelpView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.21.1 Detailed Description

HelpView (p. 56)

Interaction logic for HelpView.xaml

Definition at line 41 of file **HelpView.g.cs**.

6.21.2 Constructor & Destructor Documentation

6.21.2.1 HelpView()

`HandballStatistics.GUI.Views.HelpView.HelpView ()`

Definition at line 23 of file **HelpView.xaml.cs**.

6.21.3 Member Function Documentation

6.21.3.1 InitializeComponent() [1/2]

`void HandballStatistics.GUI.Views.HelpView.InitializeComponent ()`

InitializeComponent

Definition at line 50 of file **HelpView.g.cs**.

6.21.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Views.HelpView.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **HelpView.g.i.cs**.

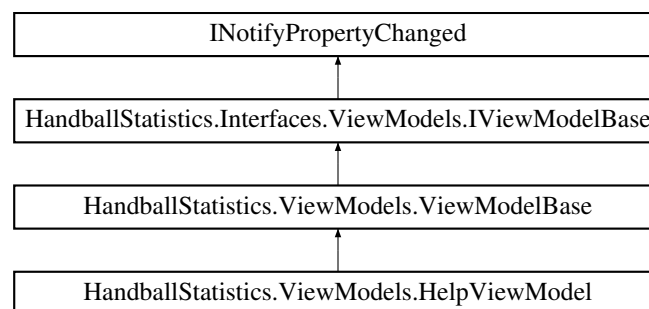

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/HelpView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/HelpView.g.i.cs
- HandballStatistics.GUI/Views/HelpView.xaml.cs

6.22 HandballStatistics.ViewModels.HelpViewModel Class Reference

Base class for **HelpViewModel** (p. 57). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.HelpViewModel:

Public Member Functions

- **HelpViewModel ()**
Prevents a default instance of the **HelpViewModel** (p. 57) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.HelpViewModel** (p. 57) class.

Properties

- string **Username** [get, set]
Gets or sets username.
- string **WelcomeMessage** [get, set]
Gets or sets welcomeMessage.

Additional Inherited Members

6.22.1 Detailed Description

Base class for **HelpViewModel** (p. 57). Derives from **ViewModelBase** (p. 117) class.

Definition at line 7 of file **HelpViewModel.cs**.

6.22.2 Constructor & Destructor Documentation

6.22.2.1 HelpViewModel()

```
HandballStatistics.ViewModels.HelpViewModel.HelpViewModel ( )
```

Prevents a default instance of the **HelpViewModel** (p. 57) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.HelpViewModel** (p. 57) class.

Definition at line 26 of file **HelpViewModel.cs**.

6.22.3 Property Documentation

6.22.3.1 Username

```
string HandballStatistics.ViewModels.HelpViewModel.Username [get], [set]
```

Gets or sets username.

Definition at line 37 of file **HelpViewModel.cs**.

6.22.3.2 WelcomeMessage

```
string HandballStatistics.ViewModels.HelpViewModel.WelcomeMessage [get], [set]
```

Gets or sets welcomeMessage.

Definition at line 50 of file **HelpViewModel.cs**.

The documentation for this class was generated from the following file:

6.26.2 Member Function Documentation

6.26.2.1 CreateViewModel()

```
HomeViewModel HandballStatistics.Services.Factories.HomeViewModelFactory.CreateViewModel ( )
```

Definition at line 8 of file **HomeViewModelFactory.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/HomeViewModelFactory.cs

6.27 HandballStatistics.Interfaces.Services.IAccountDataService Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Services.IAccountDataService:

Public Member Functions

- Task< **Account** > **GetByUsername** (string username)
- Task< **Account** > **GetByEmail** (string email)

6.27.1 Detailed Description

Definition at line 11 of file **IAccountDataService.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Services/IAccountDataService.cs

6.28 HandballStatistics.Interfaces.Services.IAuthenticationService Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Services.IAuthenticationService:

Public Member Functions

- Task< RegistrationResult > **Register** (string username, string email, string password, string confirmPassword)
- Task< **Account** > **Login** (string username, string password)

6.28.1 Detailed Description

Definition at line 14 of file **IAuthenticationService.cs**.

6.28.2 Member Function Documentation

6.28.2.1 Login()

```
Task< Account > HandballStatistics.Interfaces.Services.IAuthenticationService.Login (
    string username,
    string password )
```

Implemented in **HandballStatistics.Services.AuthenticationServices.AuthenticationService** (p. 32).

6.28.2.2 Register()

```
Task< RegistrationResult > HandballStatistics.Interfaces.Services.IAuthenticationService.↵
Register (
    string username,
    string email,
    string password,
    string confirmPassword )
```

Implemented in **HandballStatistics.Services.AuthenticationServices.AuthenticationService** (p. 33).

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Services/IAuthenticationService.cs

6.29 HandballStatistics.Interfaces.Authenticators.IAuthenticator Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Authenticators.IAuthenticator:

Public Member Functions

- Task< RegistrationResult > **Register** (string username, string email, string password, string confirm↵ Password)
- Task< bool > **Login** (string username, string password)
- void **Logout** ()

Properties

- **Account CurrentAccount** [get]
- **bool IsLoggedIn** [get]

6.29.1 Detailed Description

Definition at line 11 of file **IAuthenticator.cs**.

6.29.2 Member Function Documentation

6.29.2.1 Login()

```
Task< bool > HandballStatistics.Interfaces.Authenticators.IAuthenticator.Login (
    string username,
    string password )
```

Implemented in **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 34).

6.29.2.2 Logout()

```
void HandballStatistics.Interfaces.Authenticators.IAuthenticator.Logout ( )
```

Implemented in **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 35).

6.29.2.3 Register()

```
Task< RegistrationResult > HandballStatistics.Interfaces.Authenticators.IAuthenticator.↵
Register (
    string username,
    string email,
    string password,
    string confirmPassword )
```

Implemented in **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 35).

6.29.3 Property Documentation

6.29.3.1 CurrentAccount

Account HandballStatistics.Interfaces.Authenticators.IAuthenticator.CurrentAccount [get]

Implemented in **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 36).

Definition at line 13 of file **IAuthenticator.cs**.

6.29.3.2 IsLoggedIn

bool HandballStatistics.Interfaces.Authenticators.IAuthenticator.IsLoggedIn [get]

Implemented in **HandballStatistics.Services.AuthenticationServices.Authenticator** (p. 36).

Definition at line 15 of file **IAuthenticator.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Authenticators/IAuthenticator.cs

6.30 HandballStatistics.Interfaces.Services.IDataService< T > Interface Template Reference

Inheritance diagram for HandballStatistics.Interfaces.Services.IDataService< T >:

Public Member Functions

- Task< bool > **Init** ()
- Task< IEnumerable< T > > **GetAll** ()
- Task< T > **Get** (int id)
- Task< T > **Create** (T entity)
- Task< bool > **Delete** (int id)
- Task< T > **Update** (int id, T entity)

6.30.1 Detailed Description

Definition at line 6 of file **IDataService.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Services/IDataService.cs

6.31 HandballStatistics.Interfaces.ViewModels.ILoginViewModel Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.ViewModels.ILoginViewModel:

Properties

- string **Username** [get, set]
- string **Password** [get, set]

6.31.1 Detailed Description

Definition at line 3 of file **ILoginViewModel.cs**.

6.31.2 Property Documentation

6.31.2.1 Password

```
string HandballStatistics.Interfaces.ViewModels.ILoginViewModel.Password [get], [set]
```

Implemented in **HandballStatistics.ViewModels.LoginViewModel** (p. 83).

Definition at line 7 of file **ILoginViewModel.cs**.

6.31.2.2 Username

```
string HandballStatistics.Interfaces.ViewModels.ILoginViewModel.Username [get], [set]
```

Implemented in **HandballStatistics.ViewModels.LoginViewModel** (p. 83).

Definition at line 5 of file **ILoginViewModel.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/ViewModels/ILoginViewModel.cs

6.32 HandballStatistics.Interfaces.Navigators.INavigator Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Navigators.INavigator:

Properties

- **IViewModelBase CurrentViewModel** [get, set]

6.32.1 Detailed Description

Definition at line 17 of file **INavigator.cs**.

6.32.2 Property Documentation

6.32.2.1 CurrentViewModel

```
IViewModelBase HandballStatistics.Interfaces.Navigators.INavigator.CurrentViewModel [get],  
[set]
```

Definition at line 19 of file **INavigator.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Navigators/INavigator.cs

6.33 HandballStatistics.EntityFramework.Migrations.InitialCreate Class Reference

Inheritance diagram for HandballStatistics.EntityFramework.Migrations.InitialCreate:

Public Member Functions

- override void **Up** ()
- override void **Down** ()

6.33.1 Detailed Description

Definition at line 6 of file 202205231051171_InitialCreate.cs.

6.33.2 Member Function Documentation

6.33.2.1 Down()

```
override void HandballStatistics.EntityFramework.Migrations.InitialCreate.Down ( )
```

Definition at line 24 of file 202205231051171_InitialCreate.cs.

6.33.2.2 Up()

```
override void HandballStatistics.EntityFramework.Migrations.InitialCreate.Up ( )
```

Definition at line 8 of file 202205231051171_InitialCreate.cs.

The documentation for this class was generated from the following files:

- HandballStatistics.EntityFramework/Migrations/202205231051171_InitialCreate.cs
- HandballStatistics.EntityFramework/Migrations/202205231051171_InitialCreate.Designer.cs

6.34 HandballStatistics.Websites.Instagram Class Reference

Base class for **Instagram** (p. 69). Derives from **WebsiteBase** (p. 124) class.

Inheritance diagram for HandballStatistics.Websites.Instagram:

Public Member Functions

- **Instagram** ()

*/// Prevents a default instance of the **Instagram** (p. 69) class from being created.> Initializes a new instance of the **HandballStatistics.Websites.Instagram** (p. 69) class.*

Properties

- override string **Name** [get, set]

Gets or sets Name.

- override string **URL** [get, set]

Gets or sets URL.

6.34.1 Detailed Description

Base class for **Instagram** (p. 69). Derives from **WebsiteBase** (p. 124) class.

Definition at line 7 of file **Instagram.cs**.

6.34.2 Constructor & Destructor Documentation

6.34.2.1 Instagram()

```
HandballStatistics.Websites.Instagram.Instagram ( )
```

*/// Prevents a default instance of the **Instagram** (p. 69) class from being created.> Initializes a new instance of the **HandballStatistics.Websites.Instagram** (p. 69) class.*

Definition at line 14 of file **Instagram.cs**.

6.34.3 Property Documentation

6.34.3.1 Name

```
override string HandballStatistics.Websites.Instagram.Name [get], [set]
```

Gets or sets Name.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 25 of file **Instagram.cs**.

6.34.3.2 URL

```
override string HandballStatistics.Websites.Instagram.URL [get], [set]
```

Gets or sets URL.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 30 of file **Instagram.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Websites/Instagram.cs

6.35 HandballStatistics.Exceptions.InvalidPasswordException Class Reference

Inheritance diagram for HandballStatistics.Exceptions.InvalidPasswordException:

Public Member Functions

- **InvalidPasswordException** (string username, string password)
- **InvalidPasswordException** (string message, string username, string password)
- **InvalidPasswordException** (string message, Exception innerException, string username, string password)

Properties

- string **Username** [get, set]
- string **Password** [get, set]

6.35.1 Detailed Description

Definition at line 10 of file **InvalidPasswordException.cs**.

6.35.2 Constructor & Destructor Documentation

6.35.2.1 InvalidPasswordException() [1/3]

```
HandballStatistics.Exceptions.InvalidPasswordException.InvalidPasswordException (
    string username,
    string password )
```

Definition at line 16 of file **InvalidPasswordException.cs**.

6.35.2.2 InvalidPasswordException() [2/3]

```
HandballStatistics.Exceptions.InvalidPasswordException.InvalidPasswordException (
    string message,
    string username,
    string password )
```

Definition at line 22 of file **InvalidPasswordException.cs**.

6.35.2.3 InvalidPasswordException() [3/3]

```
HandballStatistics.Exceptions.InvalidPasswordException.InvalidPasswordException (
    string message,
    Exception innerException,
    string username,
    string password )
```

Definition at line 28 of file **InvalidPasswordException.cs**.

6.35.3 Property Documentation

6.35.3.1 Password

```
string HandballStatistics.Exceptions.InvalidPasswordException.Password [get], [set]
```

Definition at line 14 of file **InvalidPasswordException.cs**.

6.35.3.2 Username

```
string HandballStatistics.Exceptions.InvalidPasswordException.Username [get], [set]
```

Definition at line 12 of file **InvalidPasswordException.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Exceptions/InvalidPasswordException.cs

6.36 HandballStatistics.Interfaces.Navigators.IRenavigator Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Navigators.IRenavigator:

Public Member Functions

- void **Renavigate** ()

6.36.1 Detailed Description

Definition at line 9 of file **IRenavigator.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Navigators/IRenavigator.cs

6.37 HandballStatistics.Interfaces.ViewModels.IViewModelAbstractFactory Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.ViewModels.IViewModelAbstractFactory:

Public Member Functions

- **IViewModelBase CreateViewModel** (ViewType viewType)

6.37.1 Detailed Description

Definition at line 5 of file **IViewModelAbstractFactory.cs**.

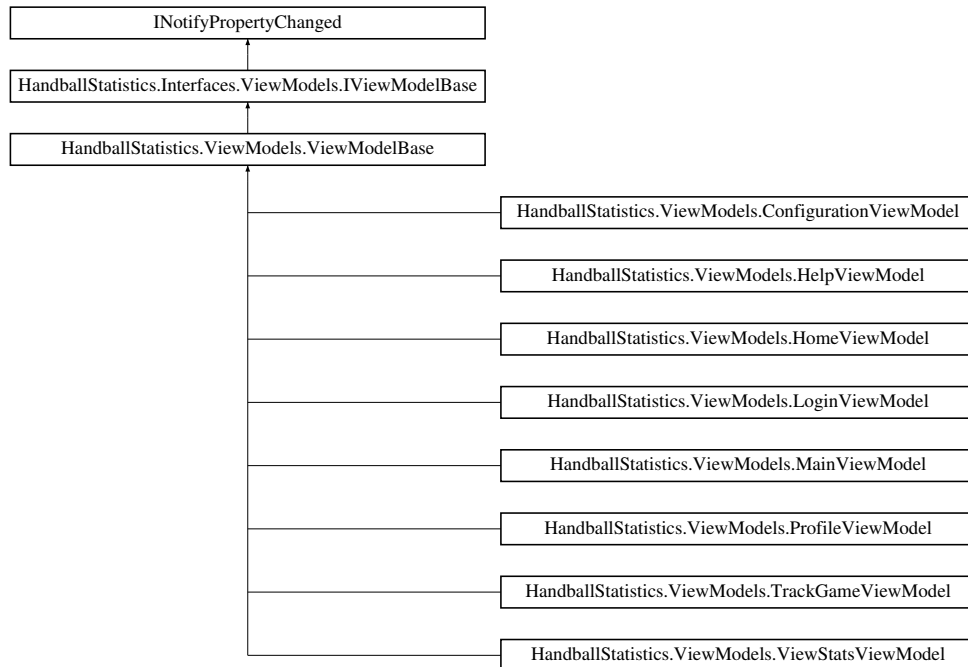

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/ViewModels/IViewModelAbstractFactory.cs

6.38 HandballStatistics.Interfaces.ViewModels.IViewModelBase

Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.ViewModels.IViewModelBase:

Public Member Functions

- void **OnPropertyChanged** (string propertyName)

6.38.1 Detailed Description

Definition at line 5 of file **IViewModelBase.cs**.

6.38.2 Member Function Documentation

6.38.2.1 OnPropertyChanged()

```
void HandballStatistics.Interfaces.ViewModels.IViewModelBase.OnPropertyChanged (
    string propertyName )
```

Implemented in **HandballStatistics.ViewModels.ViewModelBase** (p. 118).

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/ViewModels/IViewModelBase.cs

6.39 HandballStatistics.Interfaces.ViewModels.IViewModelFactory< T > Interface Template Reference

Public Member Functions

- `T CreateViewModel ()`

6.39.1 Detailed Description

Type Constraints

T: *IViewModelBase*

Definition at line 9 of file **IViewModelFactory.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/ViewModels/IViewModelFactory.cs

6.40 HandballStatistics.Interfaces.Navigators.IWebNavigator Interface Reference

Properties

- `ICommand GoToWebsiteCommand` [get]

6.40.1 Detailed Description

Definition at line 17 of file **IWebNavigator.cs**.

6.40.2 Property Documentation

6.40.2.1 GoToWebsiteCommand

`ICommand HandballStatistics.Interfaces.Navigators.IWebNavigator.GoToWebsiteCommand` [get]

Definition at line 19 of file **IWebNavigator.cs**.

The documentation for this interface was generated from the following file:

- HandballStatistics.Interfaces/Navigators/IWebNavigator.cs

6.41 HandballStatistics.Interfaces.Models.IWebsite Interface Reference

Inheritance diagram for HandballStatistics.Interfaces.Models.IWebsite:

Properties

- string **Name** [get, set]
- string **URL** [get, set]

6.41.1 Detailed Description

Definition at line 3 of file `IWebsite.cs`.

6.41.2 Property Documentation

6.41.2.1 Name

```
string HandballStatistics.Interfaces.Models.IWebsite.Name [get], [set]
```

Implemented in `HandballStatistics.Websites.Facebook` (p. 45), `HandballStatistics.Websites.Instagram` (p. 70), `HandballStatistics.Websites.Twitter` (p. 113), and `HandballStatistics.Websites.WebsiteBase` (p. 124).

Definition at line 5 of file `IWebsite.cs`.

6.41.2.2 URL

```
string HandballStatistics.Interfaces.Models.IWebsite.URL [get], [set]
```

Implemented in `HandballStatistics.Websites.Facebook` (p. 45), `HandballStatistics.Websites.Instagram` (p. 70), `HandballStatistics.Websites.Twitter` (p. 113), and `HandballStatistics.Websites.WebsiteBase` (p. 124).

Definition at line 7 of file `IWebsite.cs`.

The documentation for this interface was generated from the following file:

- `HandballStatistics.Interfaces/Models/IWebsite.cs`

6.42 HandballStatistics.Models.League Class Reference

Base class for **League** (p. 77). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.League:

Properties

- string **Name** [get, set]
Gets or sets Name.
- string **Abbreviation** [get, set]
Gets or sets Abbreviation.
- int **CountryId** [get, set]
Gets or sets CountryId.
- ICollection< **Team** > **Teams** [get, set]
Gets or sets Teams.

6.42.1 Detailed Description

Base class for **League** (p. 77). Derives from **DomainObject** (p. 42) class.

Definition at line 9 of file **League.cs**.

6.42.2 Property Documentation

6.42.2.1 Abbreviation

```
string HandballStatistics.Models.League.Abbreviation [get], [set]
```

Gets or sets Abbreviation.

Definition at line 20 of file **League.cs**.

6.42.2.2 CountryId

```
int HandballStatistics.Models.League.CountryId [get], [set]
```

Gets or sets CountryId.

Definition at line 25 of file **League.cs**.

6.42.2.3 Name

```
string HandballStatistics.Models.League.Name [get], [set]
```

Gets or sets Name.

Definition at line 15 of file **League.cs**.

6.42.2.4 Teams

```
ICollection< Team> HandballStatistics.Models.League.Teams [get], [set]
```

Gets or sets Teams.

Definition at line 30 of file **League.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/League.cs

6.43 HandballStatistics.Commands.LoginCommand Class Reference

Inheritance diagram for HandballStatistics.Commands.LoginCommand:

Public Member Functions

- **LoginCommand** (**ILoginViewModel** loginViewModel, **IAuthenticator** authenticator, **IRenavigator** renavigator)
- async override void **Execute** (object parameter)

Additional Inherited Members

6.43.1 Detailed Description

Definition at line 7 of file `LoginCommand.cs`.

6.43.2 Constructor & Destructor Documentation

6.43.2.1 LoginCommand()

```
HandballStatistics.Commands.LoginCommand.LoginCommand (
    ILoginViewModel loginViewModel,
    IAuthenticator authenticator,
    IRenavigator renavigator )
```

Definition at line 15 of file `LoginCommand.cs`.

6.43.3 Member Function Documentation

6.43.3.1 Execute()

```
async override void HandballStatistics.Commands.LoginCommand.Execute (
    object parameter ) [virtual]
```

Implements `HandballStatistics.Commands.CommandBase` (p. 36).

Definition at line 22 of file `LoginCommand.cs`.

The documentation for this class was generated from the following file:

- `HandballStatistics.Commands/LoginCommand.cs`

6.44 HandballStatistics.GUI.Views.LoginView Class Reference

LoginView (p. 79)

Inheritance diagram for `HandballStatistics.GUI.Views.LoginView`:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

Static Public Attributes

- static readonly DependencyProperty **LoginCommandProperty**

Properties

- ICommand **LoginCommand** [get, set]

6.44.1 Detailed Description

LoginView (p. 79)

Interaction logic for LoginView.xaml

Definition at line 41 of file **LoginView.g.cs**.

6.44.2 Constructor & Destructor Documentation

6.44.2.1 LoginView()

```
HandballStatistics.GUI.Views.LoginView.LoginView ( )
```

Definition at line 32 of file **LoginView.xaml.cs**.

6.44.3 Member Function Documentation

6.44.3.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.Views.LoginView.InitializeComponent ( )
```

InitializeComponent

Definition at line 74 of file **LoginView.g.cs**.

6.44.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Views.LoginView.InitializeComponent ( )
```

InitializeComponent

Definition at line 74 of file **LoginView.g.i.cs**.

6.44.4 Member Data Documentation

6.44.4.1 LoginCommandProperty

```
readonly DependencyProperty HandballStatistics.GUI.Views.LoginView.LoginCommandProperty [static]
```

Initial value:

=

```
DependencyProperty.Register("LoginCommand", typeof(ICommand), typeof(LoginView), new  
PropertyMetadata(null))
```

Definition at line 23 of file **LoginView.xaml.cs**.

6.44.5 Property Documentation

6.44.5.1 LoginCommand

```
ICommand HandballStatistics.GUI.Views.LoginView.LoginCommand [get], [set]
```

Definition at line 26 of file **LoginView.xaml.cs**.

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/LoginView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/LoginView.g.i.cs
- HandballStatistics.GUI/Views/LoginView.xaml.cs

6.45 HandballStatistics.ViewModels.LoginViewModel Class Reference

Base class for **LoginViewModel** (p. 81). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.LoginViewModel:

Public Member Functions

- **LoginViewModel** (**IAuthenticator** authenticator, **IRenavigator** renavigator)

*Prevents a default instance of the **LoginViewModel** (p. 81) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.LoginViewModel** (p. 81) class.*

Properties

- string **Username** [get, set]
Gets or sets username.
- string **Password** [get, set]
Gets or sets password.
- ICommand **LoginCommand** [get]
Gets LoginCommand.

Additional Inherited Members

6.45.1 Detailed Description

Base class for **LoginViewModel** (p. 81). Derives from **ViewModelBase** (p. 117) class.

Definition at line 13 of file **LoginViewModel.cs**.

6.45.2 Constructor & Destructor Documentation

6.45.2.1 LoginViewModel()

```
HandballStatistics.ViewModels.LoginViewModel.LoginViewModel (
    IAuthenticator authenticator,
    IRenavigator renavigator )
```

Prevents a default instance of the **LoginViewModel** (p. 81) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.LoginViewModel** (p. 81) class.

Parameters

<i>authenticator</i>	Registered authentication service.
<i>renavigator</i>	Registered service.

Definition at line 34 of file **LoginViewModel.cs**.

6.45.3 Property Documentation

6.45.3.1 LoginCommand

```
 ICommand HandballStatistics.ViewModels.LoginViewModel.LoginCommand [get]
```

Gets LoginCommand.

Definition at line 72 of file **LoginViewModel.cs**.

6.45.3.2 Password

```
 string HandballStatistics.ViewModels.LoginViewModel.Password [get], [set]
```

Gets or sets password.

Implements **HandballStatistics.Interfaces.ViewModels.ILoginViewModel** (p. 67).

Definition at line 57 of file **LoginViewModel.cs**.

6.45.3.3 Username

```
 string HandballStatistics.ViewModels.LoginViewModel.Username [get], [set]
```

Gets or sets username.

Implements **HandballStatistics.Interfaces.ViewModels.ILoginViewModel** (p. 67).

Definition at line 44 of file **LoginViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/LoginViewModel.cs

6.46 HandballStatistics.Services.Factories.LoginViewModelFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.LoginViewModelFactory:

Public Member Functions

- **LoginViewModelFactory** (**IA Authenticator** authenticator, **IRenavigator** renavigator)
- **LoginViewModel** **CreateViewModel** ()

6.46.1 Detailed Description

Definition at line 8 of file **LoginViewModelFactory.cs**.

6.46.2 Constructor & Destructor Documentation

6.46.2.1 LoginViewModelFactory()

```
HandballStatistics.Services.Factories.LoginViewModelFactory.LoginViewModelFactory (
    IA Authenticator authenticator,
    IRenavigator renavigator )
```

Definition at line 14 of file **LoginViewModelFactory.cs**.

6.46.3 Member Function Documentation

6.46.3.1 CreateViewModel()

```
LoginViewModel HandballStatistics.Services.Factories.LoginViewModelFactory.CreateViewModel (
)
```

Definition at line 20 of file **LoginViewModelFactory.cs**.

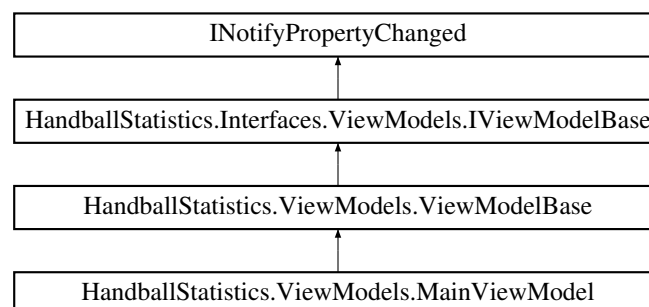

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/LoginViewModelFactory.cs

6.47 HandballStatistics.ViewModels.MainViewModel Class Reference

Base class for **MainViewModel** (p. 84). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.MainViewModel:

Public Member Functions

- **MainViewModel** (**INavigator** navigator, **IViewModelAbstractFactory** viewModelAbstractFactory, **IAuthenticator** authenticator)

*Prevents a default instance of the **MainViewModel** (p. 84) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.MainViewModel** (p. 84) class.*

Properties

- **INavigator Navigator** [get, set]
Gets or sets Navigator.
- **IAuthenticator Authenticator** [get, set]
Gets or sets Authenticator.
- ICommand **UpdateCurrentViewModelCommand** [get]
Gets UpdateCurrentViewModelCommand.
- ICommand **GoToWebsiteCommand** [get, set]
Gets or sets GoToWebsiteCommand.

Additional Inherited Members

6.47.1 Detailed Description

Base class for **MainViewModel** (p. 84). Derives from **ViewModelBase** (p. 117) class.

Definition at line 13 of file **MainViewModel.cs**.

6.47.2 Constructor & Destructor Documentation

6.47.2.1 MainViewModel()

```
HandballStatistics.ViewModels.MainViewModel.MainViewModel (
    INavigator navigator,
    IViewModelAbstractFactory viewModelAbstractFactory,
    IAuthenticator authenticator )
```

Prevents a default instance of the **MainViewModel** (p. 84) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.MainViewModel** (p. 84) class.

Parameters

<i>navigator</i>	Registered navigation service.
<i>viewModelAbstractFactory</i>	Registered factory service.
<i>authenticator</i>	Registered authentication service.

Definition at line 30 of file **MainViewModel.cs**.

6.47.3 Property Documentation

6.47.3.1 Authenticator

IAuthenticator HandballStatistics.ViewModels.MainViewModel.Authenticator [get], [set]

Gets or sets Authenticator.

Definition at line 52 of file **MainViewModel.cs**.

6.47.3.2 GoToWebsiteCommand

ICommand HandballStatistics.ViewModels.MainViewModel.GoToWebsiteCommand [get], [set]

Gets or sets GoToWebsiteCommand.

Definition at line 64 of file **MainViewModel.cs**.

6.47.3.3 Navigator

INavigator HandballStatistics.ViewModels.MainViewModel.Navigator [get], [set]

Gets or sets Navigator.

Definition at line 47 of file **MainViewModel.cs**.

6.47.3.4 UpdateCurrentViewModelCommand

ICommand HandballStatistics.ViewModels.MainViewModel.UpdateCurrentViewModelCommand [get]

Gets UpdateCurrentViewModelCommand.

Definition at line 59 of file **MainViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/MainViewModel.cs

6.48 HandballStatistics.GUI.MainWindow Class Reference

Interaction logic for MainWindow.xaml

Inheritance diagram for HandballStatistics.GUI.MainWindow:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.48.1 Detailed Description

Interaction logic for MainWindow.xaml

MainWindow (p. 87)

Definition at line 8 of file **MainWindow.xaml.cs**.

6.48.2 Constructor & Destructor Documentation

6.48.2.1 MainWindow()

`HandballStatistics.GUI.MainWindow.MainWindow ()`

Definition at line 10 of file **MainWindow.xaml.cs**.

6.48.3 Member Function Documentation

6.48.3.1 InitializeComponent() [1/2]

`void HandballStatistics.GUI.MainWindow.InitializeComponent ()`

InitializeComponent

Definition at line 50 of file **MainWindow.g.cs**.

6.48.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.MainWindow.InitializeComponent ( )
```

InitializeComponent

Definition at line **50** of file **MainWindow.g.i.cs**.

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/MainWindow.xaml.cs
- HandballStatistics.GUI/obj/Debug/MainWindow.g.cs
- HandballStatistics.GUI/obj/Debug/MainWindow.g.i.cs

6.49 HandballStatistics.Models.Match Class Reference

Base class for **Match** (p. 88). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Match:

Properties

- string **Name** [get, set]
Gets or sets Name.
- DateTime **Date** [get, set]
Gets or sets Date.
- string **FileName** [get, set]
Gets or sets FileName.
- ICollection< **Shot** > **Shots** [get, set]
Gets or sets Shots.

6.49.1 Detailed Description

Base class for **Match** (p. 88). Derives from **DomainObject** (p. 42) class.

Definition at line **10** of file **Match.cs**.

6.49.2 Property Documentation

6.49.2.1 Date

```
DateTime HandballStatistics.Models.Match.Date [get], [set]
```

Gets or sets Date.

Definition at line 21 of file **Match.cs**.

6.49.2.2 FileName

```
string HandballStatistics.Models.Match.FileName [get], [set]
```

Gets or sets FileName.

Definition at line 26 of file **Match.cs**.

6.49.2.3 Name

```
string HandballStatistics.Models.Match.Name [get], [set]
```

Gets or sets Name.

Definition at line 16 of file **Match.cs**.

6.49.2.4 Shots

```
ICollection< Shot> HandballStatistics.Models.Match.Shots [get], [set]
```

Gets or sets Shots.

Definition at line 31 of file **Match.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Match.cs

6.50 HandballStatistics.GUI.Controls.NavigationBar Class Reference

Interaction logic for NavigationBar.xaml

Inheritance diagram for HandballStatistics.GUI.Controls.NavigationBar:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.50.1 Detailed Description

Interaction logic for NavigationBar.xaml

NavigationBar (p. 89)

Definition at line 21 of file **NavigationBar.xaml.cs**.

6.50.2 Constructor & Destructor Documentation

6.50.2.1 NavigationBar()

```
HandballStatistics.GUI.Controls.NavigationBar.NavigationBar ( )
```

Definition at line 23 of file **NavigationBar.xaml.cs**.

6.50.3 Member Function Documentation

6.50.3.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.Controls.NavigationBar.InitializeComponent ( )
```

InitializeComponent

Definition at line 124 of file **NavigationBar.g.cs**.

6.50.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Controls.NavigationBar.InitializeComponent ( )
```

InitializeComponent

Definition at line 124 of file **NavigationBar.g.i.cs**.

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/Controls/NavigationBar.xaml.cs
- HandballStatistics.GUI/obj/Debug/Controls/NavigationBar.g.cs
- HandballStatistics.GUI/obj/Debug/Controls/NavigationBar.g.i.cs

6.51 HandballStatistics.GUI.Styles.Controls.NavigationBarButtons Class Reference

NavigationBarButtons (p. 91)

Inheritance diagram for HandballStatistics.GUI.Styles.Controls.NavigationBarButtons:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent

6.51.1 Detailed Description

NavigationBarButtons (p. 91)

Definition at line 41 of file **NavigationBarButtons.g.i.cs**.

6.51.2 Member Function Documentation

6.51.2.1 InitializeComponent()

```
void HandballStatistics.GUI.Styles.Controls.NavigationBarButtons.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **NavigationBarButtons.g.i.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.GUI/obj/Debug/Styles/Controls/NavigationBarButtons.g.i.cs

6.52 HandballStatistics.Services.Navigators.Navigator Class Reference

Inheritance diagram for HandballStatistics.Services.Navigators.Navigator:

Properties

- **IViewModelBase CurrentViewModel** [get, set]

Additional Inherited Members

6.52.1 Detailed Description

Definition at line 9 of file **Navigator.cs**.

6.52.2 Property Documentation

6.52.2.1 CurrentViewModel

IViewModelBase HandballStatistics.Services.Navigators.Navigator.CurrentViewModel [get], [set]

Implements **HandballStatistics.Interfaces.Navigators.INavigator** (p. 68).

Definition at line 13 of file **Navigator.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Navigators/Navigator.cs

6.53 HandballStatistics.Services.DbServices.NonQueryDataService< T > Class Template Reference

Public Member Functions

- **NonQueryDataService** (**HandballStatisticsDbContext** context)
- **async Task< T > Create** (T entity)
- **async Task< T > Update** (int id, T entity)
- **async Task< bool > Delete** (int id)

6.53.1 Detailed Description

Type Constraints

T : *DomainObject*

Definition at line 12 of file **NonQueryDataService.cs**.

6.53.2 Constructor & Destructor Documentation

6.53.2.1 NonQueryDataService()

```
HandballStatistics.Services.DbServices.NonQueryDataService< T >. NonQueryDataService (
    HandballStatisticsDbContext context )
```

Definition at line 16 of file **NonQueryDataService.cs**.

6.53.3 Member Function Documentation

6.53.3.1 Create()

```
async Task< T > HandballStatistics.Services.DbServices.NonQueryDataService< T >.Create (
    T entity )
```

Definition at line 21 of file **NonQueryDataService.cs**.

6.53.3.2 Delete()

```
async Task< bool > HandballStatistics.Services.DbServices.NonQueryDataService< T >.Delete (
    int id )
```

Definition at line 46 of file **NonQueryDataService.cs**.

6.53.3.3 Update()

```
async Task< T > HandballStatistics.Services.DbServices.NonQueryDataService< T >.Update (
    int id,
    T entity )
```

Definition at line 32 of file **NonQueryDataService.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/DbServices/NonQueryDataService.cs

6.54 HandballStatistics.Models.ObservableObject Class Reference

Base class for **ObservableObject** (p. 94). Derives from INotifyPropertyChanged class.

Inheritance diagram for HandballStatistics.Models.ObservableObject:

Protected Member Functions

- void **OnPropertyChanged** (string propertyName)
*Raises **PropertyChanged** (p. 95) event.*

Events

- PropertyChangedEventHandler **PropertyChanged**
*Occurs when **OnPropertyChanged(string)** (p. 94) is raised.*

6.54.1 Detailed Description

Base class for **ObservableObject** (p. 94). Derives from INotifyPropertyChanged class.

Definition at line 9 of file **ObservableObject.cs**.

6.54.2 Member Function Documentation

6.54.2.1 OnPropertyChanged()

```
void HandballStatistics.Models.ObservableObject.OnPropertyChanged (
    string propertyName ) [protected]
```

Raises **PropertyChanged** (p. 95) event.

Parameters

<i>propertyName</i>	String value of property name.
---------------------	--------------------------------

Definition at line 23 of file **ObservableObject.cs**.

6.54.3 Event Documentation

6.54.3.1 PropertyChanged

`PropertyChangedEventHandler HandballStatistics.Models.ObservableObject.PropertyChanged`

Occurs when **OnPropertyChanged(string)** (p. 94) is raised.

Definition at line 15 of file **ObservableObject.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/ObservableObject.cs

6.55 HandballStatistics.Models.Player Class Reference

Base class for **Player** (p. 95). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Player:

Public Member Functions

- string **FullName** ()
*Creates **Player** (p. 95) full name.*

Properties

- string **FirstName** [get, set]
Gets or sets FirstName.
- string **LastName** [get, set]
Gets or sets LastName.
- int **JerseyNumber** [get, set]
Gets or sets JerseyNumber.
- int **Goals** [get, set]
Gets or sets Goals.
- int **TeamId** [get, set]
Gets or sets TeamId.

6.55.1 Detailed Description

Base class for **Player** (p. 95). Derives from **DomainObject** (p. 42) class.

Definition at line 7 of file **Player.cs**.

6.55.2 Member Function Documentation

6.55.2.1 FullName()

```
string HandballStatistics.Models.Player.FullName ( )
```

Creates **Player** (p. 95) full name.

Returns

Full **Player** (p. 95) name.

Definition at line 41 of file **Player.cs**.

6.55.3 Property Documentation

6.55.3.1 FirstName

```
string HandballStatistics.Models.Player.FirstName [get], [set]
```

Gets or sets FirstName.

Definition at line 13 of file **Player.cs**.

6.55.3.2 Goals

```
int HandballStatistics.Models.Player.Goals [get], [set]
```

Gets or sets Goals.

Definition at line 28 of file **Player.cs**.

6.55.3.3 JerseyNumber

```
int HandballStatistics.Models.Player.JerseyNumber [get], [set]
```

Gets or sets JerseyNumber.

Definition at line 23 of file **Player.cs**.

6.55.3.4 LastName

```
string HandballStatistics.Models.Player.LastName [get], [set]
```

Gets or sets LastName.

Definition at line 18 of file **Player.cs**.

6.55.3.5 TeamId

```
int HandballStatistics.Models.Player.TeamId [get], [set]
```

Gets or sets TeamId.

Definition at line 33 of file **Player.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Player.cs

6.56 HandballStatistics.GUI.Views.ProfileView Class Reference

ProfileView (p. 97)

Inheritance diagram for HandballStatistics.GUI.Views.ProfileView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.56.1 Detailed Description

ProfileView (p. 97)

Interaction logic for ProfileView.xaml

Definition at line 41 of file **ProfileView.g.cs**.

6.56.2 Constructor & Destructor Documentation

6.56.2.1 ProfileView()

```
HandballStatistics.GUI.Views.ProfileView.ProfileView ( )
```

Definition at line 23 of file **ProfileView.xaml.cs**.

6.56.3 Member Function Documentation

6.56.3.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.Views.ProfileView.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **ProfileView.g.cs**.

6.56.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Views.ProfileView.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **ProfileView.g.i.cs**.

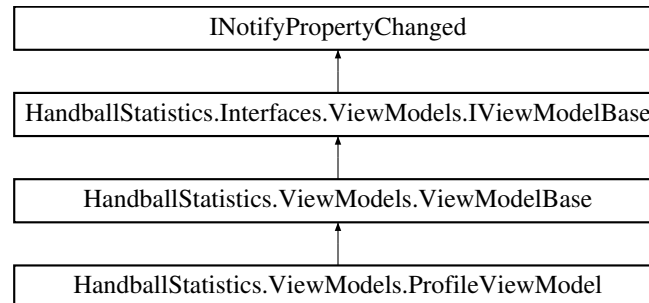

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/ProfileView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/ProfileView.g.i.cs
- HandballStatistics.GUI/Views/ProfileView.xaml.cs

6.57 HandballStatistics.ViewModels.ProfileViewModel Class Reference

Base class for **ProfileViewModel** (p. 99). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.ProfileViewModel:

Public Member Functions

- **ProfileViewModel ()**

*Prevents a default instance of the **ProfileViewModel** (p. 99) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ProfileViewModel** (p. 99) class.*

Properties

- string **Username** [get, set]
Gets or sets username.
- string **WelcomeMessage** [get, set]
Gets or sets welcomeMessage.

Additional Inherited Members

6.57.1 Detailed Description

Base class for **ProfileViewModel** (p. 99). Derives from **ViewModelBase** (p. 117) class.

Definition at line 7 of file **ProfileViewModel.cs**.

6.57.2 Constructor & Destructor Documentation

6.57.2.1 ProfileViewModel()

```
HandballStatistics.ViewModels.ProfileViewModel.ProfileViewModel ( )
```

Prevents a default instance of the **ProfileViewModel** (p. 99) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ProfileViewModel** (p. 99) class.

Definition at line 26 of file **ProfileViewModel.cs**.

6.57.3 Property Documentation

6.57.3.1 Username

```
string HandballStatistics.ViewModels.ProfileViewModel.Username [get], [set]
```

Gets or sets username.

Definition at line 37 of file **ProfileViewModel.cs**.

6.57.3.2 WelcomeMessage

```
string HandballStatistics.ViewModels.ProfileViewModel.WelcomeMessage [get], [set]
```

Gets or sets welcomeMessage.

Definition at line 50 of file **ProfileViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/ProfileViewModel.cs

6.58 HandballStatistics.Services.Factories.ProfileViewModelFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.ProfileViewModelFactory:

Public Member Functions

- **ProfileViewModel** CreateViewModel ()

6.58.1 Detailed Description

Definition at line 11 of file **ProfileViewModelFactory.cs**.

6.58.2 Member Function Documentation

6.58.2.1 CreateViewModel()

```
ProfileViewModel HandballStatistics.Services.Factories.ProfileViewModelFactory.CreateView↵  
Model ( )
```

Definition at line 13 of file **ProfileViewModelFactory.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/ProfileViewModelFactory.cs

6.59 HandballStatistics.Testing.Program Class Reference

Base class for **Program** (p. 101).

Static Public Member Functions

- static void **Main** (string[] args)
Main Method

6.59.1 Detailed Description

Base class for **Program** (p. 101).

Definition at line 16 of file **Program.cs**.

6.59.2 Member Function Documentation

6.59.2.1 Main()

```
static void HandballStatistics.Testing.Program.Main (  
    string[] args ) [static]
```

Main Method

Parameters

<i>args</i>	Main method args.
-------------	-------------------

Definition at line 22 of file **Program.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Testing/Program.cs

6.60 HandballStatistics.Models.Shot Class Reference

Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Shot:

Properties

- int **MatchId** [get, set]
Gets or sets MatchId.
- bool **Goal** [get, set]
Gets or sets a value indicating whether a Goal was scored or not.
- int **SquareNumber** [get, set]
Gets or sets SquareNumber.
- DateTime **Time** [get, set]
Gets or sets Time.
- int **PlayerId** [get, set]
Gets or sets PlayerId.
- int **TeamId** [get, set]
Gets or sets TeamId.

6.60.1 Detailed Description

Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.

Definition at line 9 of file **Shot.cs**.

6.60.2 Property Documentation

6.60.2.1 Goal

```
bool HandballStatistics.Models.Shot.Goal [get], [set]
```

Gets or sets a value indicating whether a Goal was scored or not.

Definition at line 20 of file **Shot.cs**.

6.60.2.2 MatchId

```
int HandballStatistics.Models.Shot.MatchId [get], [set]
```

Gets or sets MatchId.

Definition at line 15 of file **Shot.cs**.

6.60.2.3 PlayerId

```
int HandballStatistics.Models.Shot.PlayerId [get], [set]
```

Gets or sets PlayerId.

Definition at line 35 of file **Shot.cs**.

6.60.2.4 SquareNumber

```
int HandballStatistics.Models.Shot.SquareNumber [get], [set]
```

Gets or sets SquareNumber.

Definition at line 25 of file **Shot.cs**.

6.60.2.5 TeamId

```
int HandballStatistics.Models.Shot.TeamId [get], [set]
```

Gets or sets TeamId.

Definition at line 40 of file **Shot.cs**.

6.60.2.6 Time

`DateTime HandballStatistics.Models.Shot.Time [get], [set]`

Gets or sets Time.

Definition at line 30 of file **Shot.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Shot.cs

6.61 HandballStatistics.Models.Team Class Reference

Base class for **Team** (p. 104). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.Team:

Properties

- string **Name** [get, set]
Gets or sets Name.
- int **Leagueld** [get, set]
Gets or sets Leagueld.
- ICollection< **Player** > **Players** [get, set]
Gets or sets players.

6.61.1 Detailed Description

Base class for **Team** (p. 104). Derives from **DomainObject** (p. 42) class.

Definition at line 9 of file **Team.cs**.

6.61.2 Property Documentation

6.61.2.1 LeagueId

```
int HandballStatistics.Models.Team.LeagueId [get], [set]
```

Gets or sets LeagueId.

Definition at line 20 of file **Team.cs**.

6.61.2.2 Name

```
string HandballStatistics.Models.Team.Name [get], [set]
```

Gets or sets Name.

Definition at line 15 of file **Team.cs**.

6.61.2.3 Players

```
ICollection< Player> HandballStatistics.Models.Team.Players [get], [set]
```

Gets or sets players.

Definition at line 25 of file **Team.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Models/Team.cs

6.62 HandballStatistics.GUI.Views.TrackGameView Class Reference

TrackGameView (p. 105)

Inheritance diagram for HandballStatistics.GUI.Views.TrackGameView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.62.1 Detailed Description

TrackGameView (p. 105)

Interaction logic for TrackGameView.xaml

Definition at line 41 of file **TrackGameView.g.cs**.

6.62.2 Constructor & Destructor Documentation

6.62.2.1 TrackGameView()

```
HandballStatistics.GUI.Views.TrackGameView.TrackGameView ( )
```

Definition at line 23 of file **TrackGameView.xaml.cs**.

6.62.3 Member Function Documentation

6.62.3.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.Views.TrackGameView.InitializeComponent ( )
```

InitializeComponent

Definition at line 58 of file **TrackGameView.g.cs**.

6.62.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Views.TrackGameView.InitializeComponent ( )
```

InitializeComponent

Definition at line 58 of file **TrackGameView.g.i.cs**.

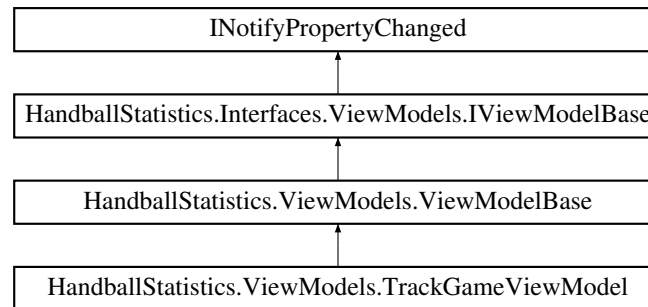

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/TrackGameView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/TrackGameView.g.i.cs
- HandballStatistics.GUI/Views/TrackGameView.xaml.cs

6.63 HandballStatistics.ViewModels.TrackGameViewModel Class Reference

Base class for **TrackGameViewModel** (p. 107). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.TrackGameViewModel:

Public Member Functions

- **TrackGameViewModel** (**IDataService**< **Country** > countryDataService, **IDataService**< **League** > leagueDataService, **IDataService**< **Hall** > hallDataService, **IDataService**< **Team** > teamDataService)
*Prevents a default instance of the **TrackGameViewModel** (p. 107) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.TrackGameViewModel** (p. 107) class.*
- void **LoadEntities** ()
Loads all needed entities.
- async void **GetCountries** ()
Fills ObservableCollection Countries.
- async void **GetLeagues** ()
Fills ObservableCollection Leagues.
- async void **GetHalls** ()
Fills ObservableCollection Halls.
- async void **GetTeams** ()
Fills ObservableCollection Teams.

Properties

- ObservableCollection< **Country** > **Countries** [get, set]
Gets or sets Countries.
- ObservableCollection< **League** > **Leagues** [get, set]
Gets or sets Leagues.
- ObservableCollection< **Hall** > **Halls** [get, set]
Gets or sets Halls.
- ObservableCollection< **Team** > **Teams** [get, set]
Gets or sets Teams.
- ICommand **NewGameCommand** [get]
Gets NewGameCommand.

Additional Inherited Members

6.63.1 Detailed Description

Base class for **TrackGameViewModel** (p. 107). Derives from **ViewModelBase** (p. 117) class.

Definition at line 12 of file **TrackGameViewModel.cs**.

6.63.2 Constructor & Destructor Documentation

6.63.2.1 TrackGameViewModel()

```
HandballStatistics.ViewModels.TrackGameViewModel.TrackGameViewModel (
    IDataService< Country > countryDataService,
    IDataService< League > leagueDataService,
    IDataService< Hall > hallDataService,
    IDataService< Team > teamDataService )
```

Prevents a default instance of the **TrackGameViewModel** (p.107) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.TrackGameViewModel** (p. 107) class.

Parameters

<i>countryDataService</i>	Registered IDataService countryDataService.
<i>leagueDataService</i>	Registered IDataService leagueDataService.
<i>hallDataService</i>	Registered IDataService hallDataService.
<i>teamDataService</i>	Registered IDataService teamDataService.

Definition at line 45 of file **TrackGameViewModel.cs**.

6.63.3 Member Function Documentation

6.63.3.1 GetCountries()

```
async void HandballStatistics.ViewModels.TrackGameViewModel.GetCountries ( )
```

Fills ObservableCollection Countries.

Definition at line 104 of file **TrackGameViewModel.cs**.

6.63.3.2 GetHalls()

```
async void HandballStatistics.ViewModels.TrackGameViewModel.GetHalls ( )
```

Fills ObservableCollection Halls.

Definition at line 122 of file **TrackGameViewModel.cs**.

6.63.3.3 GetLeagues()

```
async void HandballStatistics.ViewModels.TrackGameViewModel.GetLeagues ( )
```

Fills ObservableCollection Leagues.

Definition at line 113 of file **TrackGameViewModel.cs**.

6.63.3.4 GetTeams()

```
async void HandballStatistics.ViewModels.TrackGameViewModel.GetTeams ( )
```

Fills ObservableCollection Teams.

Definition at line 131 of file **TrackGameViewModel.cs**.

6.63.3.5 LoadEntities()

```
void HandballStatistics.ViewModels.TrackGameViewModel.LoadEntities ( )
```

Loads all needed entities.

Definition at line 93 of file **TrackGameViewModel.cs**.

6.63.4 Property Documentation

6.63.4.1 Countries

```
ObservableCollection< Country> HandballStatistics.ViewModels.TrackGameViewModel.Countries  
[get], [set]
```

Gets or sets Countries.

Definition at line 64 of file **TrackGameViewModel.cs**.

6.63.4.2 Halls

```
ObservableCollection< Hall> HandballStatistics.ViewModels.TrackGameViewModel.Halls [get],  
[set]
```

Gets or sets Halls.

Definition at line 74 of file **TrackGameViewModel.cs**.

6.63.4.3 Leagues

```
ObservableCollection< League> HandballStatistics.ViewModels.TrackGameViewModel.Leagues [get],  
[set]
```

Gets or sets Leagues.

Definition at line 69 of file **TrackGameViewModel.cs**.

6.63.4.4 NewGameCommand

```
ICommand HandballStatistics.ViewModels.TrackGameViewModel.NewGameCommand [get]
```

Gets NewGameCommand.

Definition at line 86 of file **TrackGameViewModel.cs**.

6.63.4.5 Teams

```
ObservableCollection< Team> HandballStatistics.ViewModels.TrackGameViewModel.Teams [get],  
[set]
```

Gets or sets Teams.

Definition at line 79 of file **TrackGameViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/TrackGameViewModel.cs

6.64 HandballStatistics.Services.Factories.TrackGameViewModelFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.TrackGameViewModelFactory:

Public Member Functions

- **TrackGameViewModelFactory** (**IDataService**< **Country** > countryDataService, **IDataService**< **League** > leagueDataService, **IDataService**< **Hall** > hallDataService, **IDataService**< **Team** > teamDataService)
- **TrackGameViewModel** **CreateViewModel** ()

6.64.1 Detailed Description

Definition at line 8 of file **TrackGameViewModelFactory.cs**.

6.64.2 Constructor & Destructor Documentation

6.64.2.1 TrackGameViewModelFactory()

```

HandballStatistics.Services.Factories.TrackGameViewModelFactory.TrackGameViewModelFactory (
    IDataService< Country > countryDataService,
    IDataService< League > leagueDataService,
    IDataService< Hall > hallDataService,
    IDataService< Team > teamDataService )

```

Definition at line 18 of file **TrackGameViewModelFactory.cs**.

6.64.3 Member Function Documentation

6.64.3.1 CreateViewModel()

```

TrackGameViewModel HandballStatistics.Services.Factories.TrackGameViewModelFactory.Create↔
ViewModel ( )

```

Definition at line 30 of file **TrackGameViewModelFactory.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/TrackGameViewModelFactory.cs

6.65 HandballStatistics.Websites.Twitter Class Reference

Base class for **Twitter** (p. 112). Derives from **WebsiteBase** (p. 124) class.

Inheritance diagram for HandballStatistics.Websites.Twitter:

Public Member Functions

- **Twitter** ()

*Prevents a default instance of the **Twitter** (p. 112) class from being created. Initializes a new instance of the **HandballStatistics.Websites.Twitter** (p. 112) class.*

Properties

- override string **Name** [get, set]
Gets or sets Name.
- override string **URL** [get, set]
Gets or sets URL.

6.65.1 Detailed Description

Base class for **Twitter** (p. 112). Derives from **WebsiteBase** (p. 124) class.

Definition at line 7 of file **Twitter.cs**.

6.65.2 Constructor & Destructor Documentation

6.65.2.1 Twitter()

`HandballStatistics.Websites.Twitter.Twitter ()`

Prevents a default instance of the **Twitter** (p. 112) class from being created. Initializes a new instance of the **HandballStatistics.Websites.Twitter** (p. 112) class.

Definition at line 14 of file **Twitter.cs**.

6.65.3 Property Documentation

6.65.3.1 Name

```
override string HandballStatistics.Websites.Twitter.Name [get], [set]
```

Gets or sets Name.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 25 of file **Twitter.cs**.

6.65.3.2 URL

```
override string HandballStatistics.Websites.Twitter.URL [get], [set]
```

Gets or sets URL.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 30 of file **Twitter.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Websites/Twitter.cs

6.66 HandballStatistics.Commands.UpdateCurrentViewModelCommand Class Reference

Inheritance diagram for HandballStatistics.Commands.UpdateCurrentViewModelCommand:

Public Member Functions

- **UpdateCurrentViewModelCommand** (**INavigator** navigator, **IViewModelAbstractFactory** viewModelAbstractFactory)
- override void **Execute** (object parameter)

Additional Inherited Members

6.66.1 Detailed Description

Definition at line 6 of file `UpdateCurrentViewModelCommand.cs`.

6.66.2 Constructor & Destructor Documentation

6.66.2.1 UpdateCurrentViewModelCommand()

```
HandballStatistics.Commands.UpdateCurrentViewModelCommand.UpdateCurrentViewModelCommand (
    INavigator navigator,
    IViewModelAbstractFactory viewModelAbstractFactory )
```

Definition at line 12 of file `UpdateCurrentViewModelCommand.cs`.

6.66.3 Member Function Documentation

6.66.3.1 Execute()

```
override void HandballStatistics.Commands.UpdateCurrentViewModelCommand.Execute (
    object parameter ) [virtual]
```

Implements **HandballStatistics.Commands.CommandBase** (p. 36).

Definition at line 18 of file `UpdateCurrentViewModelCommand.cs`.

The documentation for this class was generated from the following file:

- `HandballStatistics.Commands/UpdateCurrentViewModelCommand.cs`

6.67 HandballStatistics.Models.User Class Reference

Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.

Inheritance diagram for HandballStatistics.Models.User:

Properties

- string **UserName** [get, set]
Gets or sets UserName.
- string **Email** [get, set]
Gets or sets Email.
- string **Password** [get, set]
Gets or sets Password.
- DateTime **DateJoined** [get, set]
Gets or sets DateJoined.

6.67.1 Detailed Description

Base class for **Shot** (p. 102). Derives from **DomainObject** (p. 42) class.

Definition at line 9 of file **User.cs**.

6.67.2 Property Documentation

6.67.2.1 DateJoined

```
DateTime HandballStatistics.Models.User.DateJoined [get], [set]
```

Gets or sets DateJoined.

Definition at line 31 of file **User.cs**.

6.67.2.2 Email

```
string HandballStatistics.Models.User.Email [get], [set]
```

Gets or sets Email.

Definition at line 21 of file **User.cs**.

6.67.2.3 Password

```
string HandballStatistics.Models.User.Password [get], [set]
```

Gets or sets Password.

Definition at line 26 of file **User.cs**.

6.67.2.4 UserName

```
string HandballStatistics.Models.User.UserName [get], [set]
```

Gets or sets UserName.

Definition at line 16 of file **User.cs**.

The documentation for this class was generated from the following file:

6.68 HandballStatistics.Services.Factories.ViewModelAbstractFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.ViewModelAbstractFactory:

Public Member Functions

- **ViewModelAbstractFactory** (**IViewModelFactory**< **HomeViewModel** > homeViewModelFactory, **IViewModelFactory**< **TrackGameViewModel** > trackGameViewModelFactory, **IViewModelFactory**< **ViewStatsViewModel** > viewStatsViewModelFactory, **IViewModelFactory**< **ConfigurationViewModel** > configurationViewModelFactory, **IViewModelFactory**< **ProfileViewModel** > profileViewModelFactory, **IViewModelFactory**< **HelpViewModel** > helpViewModelFactory, **IViewModelFactory**< **LoginViewModel** > loginViewModelFactory)
- **IViewModelBase** **CreateViewModel** (ViewType viewType)

6.68.1 Detailed Description

Definition at line 9 of file **ViewModelAbstractFactory.cs**.

6.68.2 Constructor & Destructor Documentation

6.68.2.1 ViewModelAbstractFactory()

```
HandballStatistics.Services.Factories.ViewModelAbstractFactory.ViewModelAbstractFactory (
    IViewModelFactory< HomeViewModel > homeViewModelFactory,
    IViewModelFactory< TrackGameViewModel > trackGameViewModelFactory,
    IViewModelFactory< ViewStatsViewModel > viewStatsViewModelFactory,
    IViewModelFactory< ConfigurationViewModel > configurationViewModelFactory,
    IViewModelFactory< ProfileViewModel > profileViewModelFactory,
    IViewModelFactory< HelpViewModel > helpViewModelFactory,
    IViewModelFactory< LoginViewModel > loginViewModelFactory )
```

Definition at line 19 of file **ViewModelAbstractFactory.cs**.

6.68.3 Member Function Documentation

6.68.3.1 CreateViewModel()

```
IViewModelBase HandballStatistics.Services.Factories.ViewModelAbstractFactory.CreateViewModel
(
    ViewType viewType )
```

Implements **HandballStatistics.Interfaces.ViewModels.IViewModelAbstractFactory** (p. 73).

Definition at line 37 of file **ViewModelAbstractFactory.cs**.

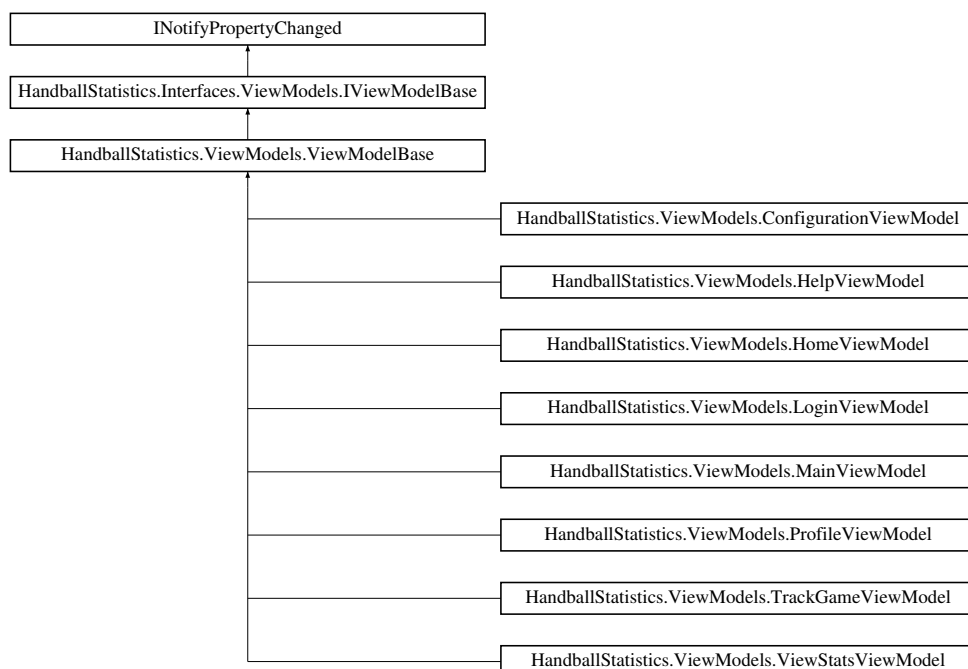

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/ViewModelAbstractFactory.cs

6.69 HandballStatistics.ViewModels.ViewModelBase Class Reference

Base class for **ViewModelBase** (p. 117). Derives from **IViewModelBase** class.

Inheritance diagram for HandballStatistics.ViewModels.ViewModelBase:

Public Member Functions

- void **OnPropertyChanged** (string propertyName)
*Raises **PropertyChanged** (p. 118) event.*

Events

- PropertyChangedEventHandler **PropertyChanged**
*Occurs when **OnPropertyChanged(string)** (p. 118) is raised.*

6.69.1 Detailed Description

Base class for **ViewModelBase** (p. 117). Derives from **IViewModelBase** class.

Definition at line 10 of file **ViewModelBase.cs**.

6.69.2 Member Function Documentation

6.69.2.1 OnPropertyChanged()

```
void HandballStatistics.ViewModels.ViewModelBase.OnPropertyChanged (
    string propertyName )
```

Raises **PropertyChanged** (p. 118) event.

Parameters

<i>propertyName</i>	String value of property name.
---------------------	--------------------------------

Implements **HandballStatistics.Interfaces.ViewModels.IViewModelBase** (p. 74).

Definition at line 24 of file **ViewModelBase.cs**.

6.69.3 Event Documentation

6.69.3.1 PropertyChanged

PropertyChangedEventHandler HandballStatistics.ViewModels.ViewModelBase.PropertyChanged

Occurs when **OnPropertyChanged(string)** (p. 118) is raised.

Definition at line 16 of file **ViewModelBase.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/ViewModelBase.cs

6.70 HandballStatistics.Services.Navigators.ViewModelFactoryRenavigator< TViewModel > Class Template Reference

Inheritance diagram for HandballStatistics.Services.Navigators.ViewModelFactoryRenavigator< TViewModel >:

Public Member Functions

- **ViewModelFactoryRenavigator** (**INavigator** navigator, **IViewModelFactory**< TViewModel > viewModelFactory)
- void **Renavigate** ()

6.70.1 Detailed Description

Type Constraints

TViewModel : *IViewModelBase*

Definition at line 6 of file **ViewModelFactoryRenavigator.cs**.

6.70.2 Constructor & Destructor Documentation

6.70.2.1 ViewModelFactoryRenavigator()

```
HandballStatistics.Services.Navigators.ViewModelFactoryRenavigator< TViewModel >. ViewModelFactoryRenavigator (
    INavigator navigator,
    IViewModelFactory< TViewModel > viewModelFactory )
```

Definition at line 12 of file **ViewModelFactoryRenavigator.cs**.

6.70.3 Member Function Documentation

6.70.3.1 Renavigate()

```
void HandballStatistics.Services.Navigators.ViewModelFactoryRenavigator< TViewModel >.Renavigate
( )
```

Implements **HandballStatistics.Interfaces.Navigators.IRenavigator** (p. 73).

Definition at line 18 of file **ViewModelFactoryRenavigator.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Navigators/ViewModelFactoryRenavigator.cs

6.71 HandballStatistics.GUI.Views.ViewStatsView Class Reference

ViewStatsView (p. 120)

Inheritance diagram for HandballStatistics.GUI.Views.ViewStatsView:

Public Member Functions

- void **InitializeComponent** ()
InitializeComponent
- void **InitializeComponent** ()
InitializeComponent

6.71.1 Detailed Description

ViewStatsView (p. 120)

Interaction logic for ViewStatsView.xaml

Definition at line 41 of file **ViewStatsView.g.cs**.

6.71.2 Constructor & Destructor Documentation

6.71.2.1 ViewStatsView()

```
HandballStatistics.GUI.Views.ViewStatsView.ViewStatsView ( )
```

Definition at line 23 of file **ViewStatsView.xaml.cs**.

6.71.3 Member Function Documentation

6.71.3.1 InitializeComponent() [1/2]

```
void HandballStatistics.GUI.Views.ViewStatsView.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **ViewStatsView.g.cs**.

6.71.3.2 InitializeComponent() [2/2]

```
void HandballStatistics.GUI.Views.ViewStatsView.InitializeComponent ( )
```

InitializeComponent

Definition at line 50 of file **ViewStatsView.g.i.cs**.

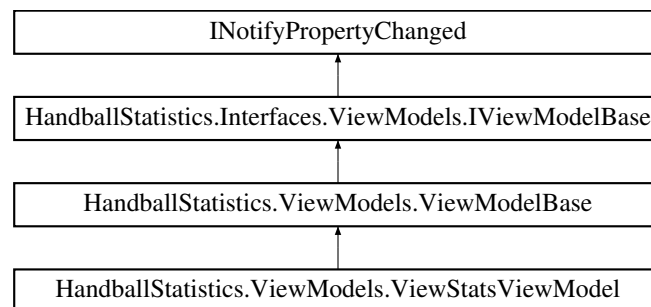

The documentation for this class was generated from the following files:

- HandballStatistics.GUI/obj/Debug/Views/ViewStatsView.g.cs
- HandballStatistics.GUI/obj/Debug/Views/ViewStatsView.g.i.cs
- HandballStatistics.GUI/Views/ViewStatsView.xaml.cs

6.72 HandballStatistics.ViewModels.ViewStatsViewModel Class Reference

Base class for **ViewStatsViewModel** (p. 121). Derives from **ViewModelBase** (p. 117) class.

Inheritance diagram for HandballStatistics.ViewModels.ViewStatsViewModel:

Public Member Functions

- **ViewStatsViewModel** ()

*Prevents a default instance of the **ViewStatsViewModel** (p. 121) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ViewStatsViewModel** (p. 121) class.*

Properties

- string **Username** [get, set]

Gets or sets username.

- string **WelcomeMessage** [get, set]

Gets or sets welcomeMessage.

Additional Inherited Members

6.72.1 Detailed Description

Base class for **ViewStatsViewModel** (p. 121). Derives from **ViewModelBase** (p. 117) class.

Definition at line 7 of file **ViewStatsViewModel.cs**.

6.72.2 Constructor & Destructor Documentation

6.72.2.1 ViewStatsViewModel()

```
HandballStatistics.ViewModels.ViewStatsViewModel.ViewStatsViewModel ( )
```

Prevents a default instance of the **ViewStatsViewModel** (p. 121) class from being created. Initializes a new instance of the **HandballStatistics.ViewModels.ViewStatsViewModel** (p. 121) class.

Definition at line 26 of file **ViewStatsViewModel.cs**.

6.72.3 Property Documentation

6.72.3.1 Username

```
string HandballStatistics.ViewModels.ViewStatsViewModel.Username [get], [set]
```

Gets or sets username.

Definition at line 37 of file **ViewStatsViewModel.cs**.

6.72.3.2 WelcomeMessage

```
string HandballStatistics.ViewModels.ViewStatsViewModel.WelcomeMessage [get], [set]
```

Gets or sets welcomeMessage.

Definition at line 50 of file **ViewStatsViewModel.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.ViewModels/ViewStatsViewModel.cs

6.73 HandballStatistics.Services.Factories.ViewStatsViewModelFactory Class Reference

Inheritance diagram for HandballStatistics.Services.Factories.ViewStatsViewModelFactory:

Public Member Functions

- **ViewStatsViewModel CreateViewModel ()**

6.73.1 Detailed Description

Definition at line 6 of file **ViewStatsViewModelFactory.cs**.

6.73.2 Member Function Documentation

6.73.2.1 CreateViewModel()

```
ViewStatsViewModel HandballStatistics.Services.Factories.ViewStatsViewModelFactory.Create↔
ViewModel ( )
```

Definition at line 8 of file **ViewStatsViewModelFactory.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Services/Factories/ViewStatsViewModelFactory.cs

6.74 HandballStatistics.Websites.WebsiteBase Class Reference

Base class for **WebsiteBase** (p. 124). Derives from IWebsite class.

Inheritance diagram for HandballStatistics.Websites.WebsiteBase:

Properties

- abstract string **Name** [get, set]
Gets or sets Name.
- abstract string **URL** [get, set]
Gets or sets URL.

6.74.1 Detailed Description

Base class for **WebsiteBase** (p. 124). Derives from IWebsite class.

Definition at line 9 of file **WebsiteBase.cs**.

6.74.2 Property Documentation

6.74.2.1 Name

```
abstract string HandballStatistics.Websites.WebsiteBase.Name [get], [set]
```

Gets or sets Name.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 14 of file **WebsiteBase.cs**.

6.74.2.2 URL

```
abstract string HandballStatistics.Websites.WebsiteBase.URL [get], [set]
```

Gets or sets URL.

Implements **HandballStatistics.Interfaces.Models.IWebsite** (p. 76).

Definition at line 19 of file **WebsiteBase.cs**.

The documentation for this class was generated from the following file:

- HandballStatistics.Websites/WebsiteBase.cs
